

# NAVCI!TE

## About

Navcite was founded in 2008 in Luleå and has grown over the years to today consist of offices in Luleå, Västerås, Linköping, Gothenburg and Helsinki. We have a long and close collaboration with Microsoft within Dynamics 365 and Azure. We sell and implement Business Central, Power Apps and Power BI.

Over the years, we have worked with many implementations and different challenges, from the Dynamics NAV of the time to today's Business Central. This has given us the experience and security to support and recommend our customers in various decisions and issues.

With Microsoft's platform Dynamics 365, we see a very positive future for us as a partner, but also a world of opportunities that opens up for the companies that take the step into the solution.

## Industry orientation

We thrive best in processes where items are refined and moved in an efficient, automated and controlled manner, i.e. manufacturing and distribution. The more complex the business, the better we enjoy it.

## Different types of assignments

Daily we help our customers around the world with different challenges in the form of ongoing support, development work of systems and processes, upgrades, global rollouts to different units and countries. No task is too small or too big and the contact routes to us are simple.

## Our team consists of

- Project managers
- Senior consultants
- Senior solution architects
- Consultants
- Integration architects
- Technology consultants
- Developers

which means that we have the opportunity to offer comprehensive commitments in all types of projects.

## Integration

At Navcite, we have extensive experience with integrations and the important processes around them. We guide you in what is required to build good integrations with a good architecture at the bottom and accompany you to make the right decision going forward for a good future. With the right foundation to stand on and strategies regarding architecture and APIs as well as trends and standards, we will move forward in digitization. Regardless of whether you have chosen technology and platform or are about to do so, we will help you along the way and are happy to work together long-term. User

## Interfaces and Apps

In our projects, we place great emphasis on creating user-friendly workspaces for different types of user roles that simplify and streamline daily work. The solutions are developed in close collaboration with our customers and are available as packaged solutions in certain areas.

## Contact
