Modern Data Warehouse in Azure: 1-Day Workshop

SERVICE TYPE: **PRICE:**
WORKSHOP   FREE

We offer 1-day workshop (in EN or RU) to discuss your business data needs (at a high level view) and demonstrate ways to optimize your data platform with Azure services. You are welcome to join from any country!

During the workshop our highly experienced specialists will discuss your current data architecture and your existing business needs. To achieve better results it is recommended for you to answer some high-level questions in advance and prepare some materials for the meeting. Our data platform architect will discuss ways your data platform can be improved with Azure. As a result you will understand how well the current Azure services cover your requirements and how many additional customizations may be required.

The workshop is held online.

Agenda
Part 1 (1 hour) – Agile Analytics Platform in Azure
Modern Data Warehouse practices, new opportunities for analysis, common customer patterns, case studies
Part 2 (1 hour) – Advanced data processing and data analysis
Modern ETL, Analysis Services and Power BI, Azure ML Service, Streaming analytics
Part 3 (1 hour) – Cloud migration: challenges and opportunities
Migrating from local solutions to Azure, costs and benefits, security and compliance
Part 4 (1 hour) – DEMO or Customer case study
Navicon BI with Azure: Azure Data Factory + Azure SQL DB + Azure Synapse + Azure Analysis Services + Power BI

Deliverables
Express Fit-Gap Analysis document (a high level view, in English).
