

# Navisite Services for RISE with SAP on Azure

Take full advantage of RISE with SAP and transform your business on Azure.

SAP's RISE offering empowers organizations to overcome the traditional roadblocks to modernization through a customizable, subscription-based "as a service" model that lets users move to the cloud and S/4HANA at their own pace. As a digital transformation partner with deep SAP application and industry expertise, we can help you take full advantage of RISE—no matter where you are on your journey. Navisite is an Azure Expert MSP as well as an SAP Gold Partner through our acquisition of Dickinson + Associates. Rely on our guidance and RISE services to move forward with the business of transformation and maximize your SAP and cloud investments.

## KEY BENEFITS

- **Complete solution** with services that are not part of RISE—including implementation, advisory and managed application services—to ensure a successful move to Azure and S/4HANA.
- **Business transformation** through proven methodologies that are uniquely tailored to your timeline and where you are in your journey.
- **Elevated results** with Navisite's specialized services that extend your RISE benefits, cloud integration and SAP functionality to be pervasive across the business.
- **Access to comprehensive SAP services**, including HANA, S/4HANA and intelligent technologies that will help you lower costs and reduce risk while driving innovation on the cloud.

## SERVICES INCLUDE

### S/4HANA MOVE PACKAGES

- Move from SAP ECC to S/4HANA with conversion packages rightsized for your requirements
- Get the best-fit move package for your business based on how you use SAP today, the number of simplifications, number of remediation items and database size
- Maintain what makes your organization's use of SAP unique by leveraging SAP's Private Cloud Edition (PCE) and working with a trusted partner on your Brownfield migration

### S/4HANA IMPLEMENTATION PACKAGES

- Chart your path to S/4HANA with implementation packages to help you adopt SAP
- Choose from small, medium and large packages based on your business requirements
- Take advantage of our strong industry-specific solutions in manufacturing, chemical, life sciences, emerging markets and wholesale distribution

### APPLICATION MANAGED SERVICES PACKAGES

- Drive more value out of your investment with 24x7 support (incident, problem, change, request)
- Get superior support—Navisite serves as the day-to-day interface between your business and SAP's Cloud Application Services (CAS)
- Rely on SAP technical and functional expertise to help you solve business problems and answer "How do I?" questions
- Benefit from a single point of escalation that will hold CAS accountable to service levels and operating level agreements
- Take advantage of application analytics, application security and data extraction services
- Choose from RISE Stewardship and Functional Support packages based on the number of modules implemented and total named users

### ADVISORY PACKAGES

- Benefit from fixed-fee advisory services that are rightsized for your business and scope of services, enabling transformation on your terms
- Implement all the software included with RISE and make usage pervasive in your business
- Evaluate and add specialized solutions to optimize your business and extend your use of SAP
- Choose from packages specific to technical upgrades, application security and enterprise enablement

### AZURE INFRASTRUCTURE SERVICES

- Deploy SAP on Azure with implementation, advisory and managed application services from Navisite
- Benefit from improved performance and reduced costs through our technical services and automation capabilities

## ONGOING INNOVATION SERVICES

- Continually build upon the promise of the SAP Intelligent Enterprise with continuous innovation and integration of new technologies, such as IoT, analytics, machine learning, AI and more

## ABOUT NAVISITE
