

Voteer Announces Collaboration with Microsoft Teams

Voteer.com, a leading all-in-one online voting platform, announces that it has developed a seamless integration with Microsoft Teams.

Teams users can, for the first time, vote directly in teams and during a live video.

With the Voteer's application for Microsoft Teams, organizations, non-profits or public institutions can quickly, easily and securely conduct an impact vote for any type of ballot whether it is an assembly, an election, a referendum and more.

"Voteer promotes the power of voting to improve governance and ESG" said David Setrouk, Founder and CEO @Voteer. "By embedding Voteer into Microsoft Teams, we simplify the vote and engage the users. Easy-to-use integration boost participation for frictionless in-person, digital or hybrid online voting."

"We are really excited to see Voteer join the Teams Apps store. Voteer in Teams brings voting more accessible, inclusive and in the flow of work to avoid disruption in the voters journey making it even more engaging" said Robin Doudoux, Product Marketing Manager for Microsoft Modern Work solutions.
