## About us

We are an IT consultation powerhouse that designs and operates for private equity asset value creation. We run and co-manage secure, IT mission-critical workloads with expert architects and certified engineers in Azure Cloud. Our Managed Services offerings in Compliance, Cybersecurity, Microsoft 365 and Azure improve operational efficiency, reduce IT costs and enhance security.

## Quick facts

Expert IT consultants specializing in private equity transactions to tackle strategic and operational M&A challenges effectively. Chances are we've solved your problem already for other clients.

Certified, multilingual engineers excel in Managed Services for Compliance, Cybersecurity, Microsoft 365, and Azure. We optimize and create value from day one.

Leading multi-geography Microsoft Direct CSP with localized operations and billing in major markets supporting local currency with clear and timely invoicing

Security, Privacy, and Compliance are our top priorities. Our team is dedicated to elevating your Microsoft 365 and Azure infrastructure to the highest security standards

## Achievements

We help our clients with Migration Fast Track services with no limits or minimums. Our Migration Services cover both Microsoft 365 and Azure

**NPS: 94**

Our happy clients fuel growth in every market, a testament to our caring service and real-time satisfaction metrics

Managing over 15,000 Microsoft 365 seats and 2,000+ Azure IaaS resources, we align with your budget.

## Our offerings

### M365 Express: Microsoft 365 Managed Services

Our Microsoft 365 Managed Services assist medium and large organizations in navigating challenges throughout their subscription lifecycle, offering benefits like tailored licensing, migration, deployment, implementation, and comprehensive training for IT teams and end-users.

#### Microsoft technology used:

Microsoft 365, Defender, Purview, Entra ID

### IT Lighthouse MANAGE: Azure Managed Services:

Our managed Azure services streamline your internal processes for ease and safety. With a dedicated team designing, architecting, and managing daily operations, maintenance, backup, monitoring, and patching, your in-house IT can focus on adding greater business value.

#### Microsoft technology used:

Azure IaaS, Azure PaaS, Azure Sentinel, Azure Lighthouse

### What our customers are saying

"ne Digital was extremely helpful in helping us develop and execute what we needed from an IT strategy perspective to support that business growth. I really enjoy working with them"

– Vikki M. Dunn, CIO, Critica Infrastructure, a Henkel Company
