

GitHub Notifications

Easily configure what and where you want to receive from GitHub events (via webhooks)

This solution will let you configure when you want to be informed about what and where.
For now we only support Slack.

Disclaimer: GitHub Notifications is an independent product and is not affiliated, associated, authorized, endorsed by, or in any way officially connected with GitHub, Inc. or any of its subsidiaries or affiliates. GitHub® is a registered trademark of GitHub, Inc.

Notification Channels

On this page, you can manage notification channels. Notification channels are the channels through which notifications are sent to users. Currently, we only support Slack as a notification channel.
