

Hybrid Integration PoC with Azure Integration Services (AIS)

Hybrid Integration Service

Azure Integration Service brings together API Management, Logic Apps, Service Bus, and Event Grid as a reliable and scalable platform for delivering on-premises and cloud-based applications, data and processes integration across your enterprise.

Why NeosAlpha

We are a certified Microsoft Partner for Application Integration. Our Microsoft Azure certified experts backed up by large number of integration projects experience and NeosAlpha's accelerated delivery approach are ready to solve your integration challenges.

Our Approach

Agenda

Day 1 | Kick-Off meeting, understand your integration scenarios and review the scope of PoC. Designing high level integration flows.

Day 2-4 | Provisioning of Azure Subscription and connection setup with source/destination systems. Building integration logic for identified scenarios with Azure Logic App to send-receive data, Azure Functions to execute a custom code. Setup of APIs to expose on-premise system. Azure Logic App Workflow to publish-subscribe messages on to Azure Service Bus or send-receive data with on premise applications. Regular checkpoints at the end of each day with the client stakeholders to access progress.

Day 5 | Final walkthrough of the approach, solution and integration processes, Proof of Concept closure, and planning of next steps.

Deliverables

- Integration scenario's build and tested on Azure Integration Services.
- Setup Azure Logic App, Azure Function, API Management, Service Bus and Event Grid to demonstrate complete integration capabilities available in Azure Integration Services..

About NeosAlpha

NeosAlpha is an integration expert IT Consulting and Services company focused on delivering accelerated value through our expertise in selective technologies, platforms and low-code approach - empowering businesses to compete and thrive in the modern data-driven economy.
