Approach

Assessment Phase:

- Evaluate Current Implementation:
- Conduct a detailed evaluation of the current Big Data implementation.
- Perform risk and compliance analysis.

Design Phase:

- Future-State Architecture:
- Design a future-state data architecture.
- Provide specific technology recommendations.

Tool Selection Process:

- Conduct a thorough selection process for relevant technologies.
- Evaluate tools based on custom criteria aligned with organizational priorities.

Implementation Phase:

- Data Strategy Roadmap:
- Develop a comprehensive data strategy roadmap.
- Assist with migration to a unified analytics platform.

Week 1: Current State Assessment Week 2: Risk & Compliance Analysis Week 3: Design Future State Architecture Week 4-5: Develop Data Strategy Roadmap and Action Plan
