

NetApp Data Migration as a Service

Enable smooth, secure, and cost-effective data migrations with the help of NetApp experts, regardless of the size or type of migration.

Data migration can be a disruptive and risky process

Safely transitioning to a new storage environment on premises or in the cloud is one of the biggest challenges that your IT department can face. Scheduling overruns, unplanned costs, and business disruption can slow and even halt the process. Business, technical, and operational requirements can also impede a successful transition. Whether you're a current NetApp customer upgrading to next-generation data management software or you're a new NetApp customer moving to a new storage environment, without the available time and right technical expertise, it can be a disruptive and risky process.

Trust the experts

NetApp® Data Migration as a Service delivers specialized expertise to smoothly and securely migrate your data from NetApp or non NetApp storage environments to any new on-premises NetApp system or to AWS, Azure, or Google Cloud services. NetApp Professional Services experts and NetApp Services Certified Partners provide the knowledge and the experience to get your systems into production quickly, while maintaining normal business operations throughout the transition. The service tailors and executes a migration plan that meets the specific requirements of your business.

Migrate data to or from anywhere

Move your data to any NetApp system—on premises or in the cloud—on time, on budget, and without data loss. Premigration planning and discovery establish a quick and efficient path to the end state that you want. By determining optimal implementation and configuration and by providing the right sequencing and tools, NetApp Data Migration as a Service mitigates business disruptions from outages and long cutovers during and after migration and maintains data protection and regulatory compliance. The ability to run parallel environments during the migration helps facilitate a complete and successful migration.

Reduce costs

NetApp makes it easy and cost-effective to complete your data migrations. Tell us how much data you need to move, and we will give you a cost in just minutes—no more long, drawn-out scoping and quoting processes. The more data you move, the lower the cost per terabyte.

Within each 1-year contract, our experts will move one workload or multiple workloads to new on-premises NetApp systems or to any hyperscaler cloud environment for a flat fee that's based on the amount of data that you are migrating. It doesn't matter where your data currently resides. There is no additional cost regardless of the migration type or tool required to perform the work. Everything you need is included—no surprises.

Key benefits

Migrate data to or from anywhere

- Move your data to the NetApp system of choice, on premises or in the cloud, while maintaining data protection and regulatory compliance.

Reduce costs

- Migrate more data for less cost with a fixed-amount per-terabyte pricing model, without limitations or hidden costs.

Reap the benefits of your new technology faster

- Enable a quick, smooth, secure data migration using proven methodologies and best practices.

Reap the benefits of your new technology faster

With deep proficiency in cloud and on-premises data migrations, NetApp Professional Services specialists use proven methodologies and tools to provide the operational flexibility to easily migrate your data to a new cloud or on-premises environment. You can depend on NetApp Professional Services to deliver a fully validated and tested NetApp environment, with your data completely intact.

Our proven data migration process includes:

- **Scope and quote.** Discuss your migration needs with the NetApp team. Determine the amount of data to migrate and the type of migration (NAS, SAN, cloud).
- **Discover.** Determine key risks and data sources in your current environment to establish a transition timeline and storage mapping to hosts.
- **Design.** Use migration requirements from the previous phase to design a complete migration plan and strategy to enable a flawless migration.
- **Implement.** Perform migration in waves, based on the migration plan. Confirm project reporting and risk management for addressing operational configurations, connectivity integration, user acceptance testing, and validation.
- **Close out.** Deliver detailed solution documentation for transition execution and confirm that all aspects of the transition plan are complete and that the project requirements have been met.

Related NetApp Services

Before transition

- **NetApp System Deployment Services.** Let NetApp experts quickly deploy and configure your new NetApp storage systems.
- **NetApp Cloud Volumes ONTAP® Implementation Service.** Quickly and securely deploy business-critical data on NetApp Cloud Volumes ONTAP across all major public clouds.

After transition

- **NetApp Managed Services.** Extend your staff and bring in a team of experts to manage, operate, and optimize your NetApp storage environment 24x7x365 with a proactive, outcome-based service model.
- **NetApp Residency Services.** Looking for a designated and named resource to augment your staff and operate as an extension of your team? NetApp Residency Services help provide ongoing, day-to-day administration and consulting skills to make sure your NetApp environment is designed, integrated, and optimized for performance, security, and data protection.
- **NetApp Support Services.** Use tools and technology such as the NetApp Active IQ® Digital Advisor tool to help you maintain business continuity by proactively managing your systems and by quickly resolving issues.

About NetApp Services

Whether you're planning your next-generation data center, need specialized know-how for a major storage deployment, or want to optimize the operational efficiency of your existing infrastructure, NetApp Services and NetApp Professional Services Certified Partners can help.
