Visium Load PerformanceTest
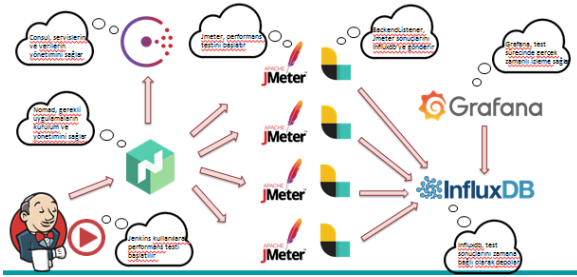

Platform for High Scable Performance and Load Testing of your Applications

With the Microsoft Azure scalable payload and performance testing platform, it allows you to quickly and reliably test the performance of your applications in the development process. Leaving resources when not in use provides cost advantage.

Visium Load is a simple to use tool that you can take advantage of the SaaS advantages and it does not require installation.

Benefits

- Saas advantages, no need for installation and it can generate traffic from different locations with self service capabilities.

- Error-free operations of the application and performance problems in the early stage of the SDLC process can be found

- Easy Accesibility: Create workspace when you need it in seconds. And it is easy to use.

Easy Installation, Flexible Structures

- Raise your test platform in minutes

- Re-use your existing Jmeter scripts

- Modify your user behavior with different scenarios

Netas Test Center Specialists are always here for you

- Let use to code performance and Load Test Scripts, you go ahead.

- Pay while you are growing with our Saas model

- Achieve problems in the early phase with Periodic Performance Measurement

  Use as much as you need, pay as much as you use

Performance Test with Microsoft and Netas cooperation

- Reserve the servers that you want on Azure

- Analyze collected data and transform it into operational intelligence

- Reduce errors, consider operational costs
