things  
about

1 Simple

2 Powerful

3 Secure

# Why do customers care about Windows 365?

Simple to buy,  
deploy, and manage

Customers like VDI, but it's complex, hard to scale across geographies and takes lots of IT resource

Windows 365 is SaaS for VDI – it's simple, scalable and requires no IT admin overhead

Always ready  
and updated

Provisioning a Windows 365 Cloud PC is simple as assigning a license in the Microsoft 365 admin portal

An IT admin can give an up-to-date Cloud PC to 1,000's of users in under 1 hour

Predictable  
costs

Traditional VDI costs are variable, and use consumption-based compute (Azure)

Windows 365 is a fixed per user per month cost, with Disaster Recovery built-in by design

Streamed to  
any devices

A Cloud PC will bring old hardware to life - think of Windows 365 as an OEM alternative

We continually performance tune and optimize the end user experience to feel like a modern physical PC

# Scenarios

The image shows a Windows taskbar notification for a cloud PC. The notification has a blue and purple gradient header with a Windows logo icon. Below the header, the title 'Mona's Cloud PC' is displayed in bold black text, followed by a settings gear icon. Underneath, it says 'Last connected 2 minutes ago'. The notification lists three specifications: '4 vCPU' with a vCPU icon, '16GB RAM' with a RAM icon, and '256GB Storage' with a storage icon. At the bottom, there is a button labeled 'Open in browser' with a browser icon.

**Mona's Cloud PC** ⚙️  
Last connected 2 minutes ago

- 4 vCPU
- 16GB RAM
- 256GB Storage

 Open in browser

# Top Use Cases for Windows 365?

- 1 Developers**  
Whether it be Excel, HPC, AutoCAD or simple VS/GitHub needs, developers need additional machines.
- 2 Citrix on-premise**  
Customers with an older on-premise Citrix environment for which the contract is ending or they need to renew the hardware (too costly so looking for alternative solutions)
- 3 External staff / Contractors**  
Customers with external staff requirements:
  - Trainees/students
  - External contractors, IT outsourcers
- 4 M & A**  
Customers with users in different regions and challenges with device shipments and shortage. Often Global/Strategic accounts. Integration costs are high

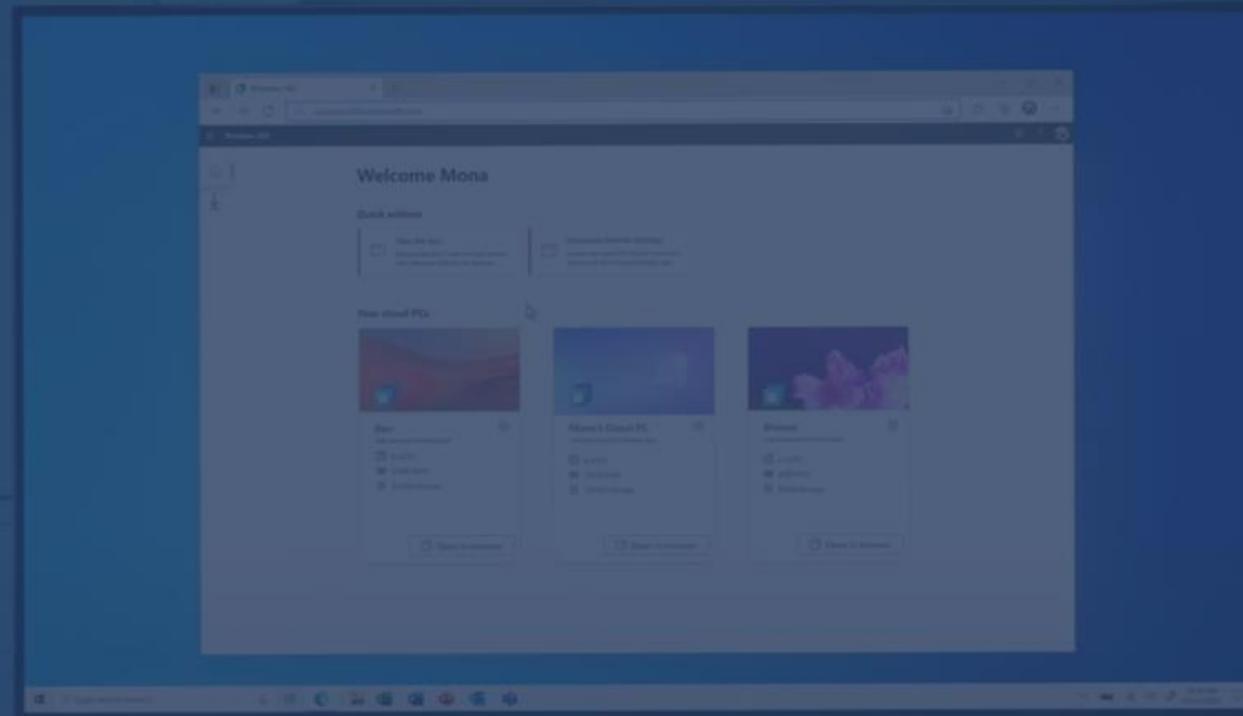

# Versatile options to meet your needs

Per-user, per-month licenses currently available on Windows / Mac, iOS / Android

VM/OS disk size	Example scenarios	Recommended apps
2 vCPU/4 GB/256 GB 2 vCPU/4 GB/128 GB 2 vCPU/4 GB/64 GB	Mergers and acquisitions, short-term and seasonal, customer services, Bring-Your-Own-PC, Work from home	Microsoft 365 Apps, Microsoft Teams (audio-only), Outlook, Excel, PowerPoint, OneDrive, Adobe Reader, Edge, line-of-business app(s), Defender support
2 vCPU/8 GB/256 GB 2 vCPU/8 GB /128 GB	Bring-Your-Own-PC, work from home, market researchers, government, consultants	Microsoft 365 Apps, Microsoft Teams, Outlook, Excel, Access, PowerPoint, OneDrive, Adobe Reader, Edge, line-of-business app(s), Defender support
4 vCPU/16 GB/512 GB 4 vCPU /16 GB /256 GB 4 vCPU /16 GB /128 GB	Finance, government, consultants, healthcare services, Bring-Your-Own-PC, work from home	Microsoft 365 Apps, Microsoft Teams, Outlook, Excel, Access, PowerPoint, Power BI, Dynamics 365, OneDrive, Adobe Reader, Edge, line-of-business app(s), Defender support
8 vCPU /32 GB /512 GB 8 vCPU /32 GB /256 GB 8 vCPU /32 GB /128 GB	Software developers, engineers, content creators, design and engineering workstations	Microsoft 365 Apps, Microsoft Teams, Outlook, Access, OneDrive, Adobe Reader, Edge, Power BI, Visual Studio Code, line-of-business app(s), Nested Virtualization support; Windows Subsystem for Linux/Android, Hyper-V, Defender support
