### NETCLEAN PROACTIVE

The hybrid workplace has amplified organization's vulnerability to security threats, and cyber-attacks are increasing by the hour, fueled by government-sponsored espionage, influence operations and criminal organizations. Most breaches today are caused by the human factor, and threat actors are continuously developing more innovative ways of accessing business critical data.

The need for organizations to protect their business is more critical than ever before, both for foreseen and unforeseen risks. CSAM is a known threat consistently overlooked by all other security tools. With NetClean's solution you bridge an existing security gap by identifying deliberate actions that can compromise your company assets with illicit material. NetClean ProActive acts as an early warning system for known threats.

### Mitigate business critical risk.

- Identifies known threats and vulnerabilities overlooked by all other security tools.
- Acts as a red flag, identifying deliberate illicit actions that compromise company assets and people, exposing companies to cyber risks.
- Trigger events and detect assets that expose companies to cyber risks, such as illicit material and bad behavior.
- Mitigates business risk of blackmail, extortion, fraud, data loss, malware etc.
- Reduce reputational risk and act as a brand insurance.

#### Unique and powerful protection.

- Real-time detection & response through advanced hashing technology, enhanced by Photo DNA.
- Optimized and persistent agent limited impact, effortless deployment, with stealth capability.
- Always active on and off-line.
- Easily integrates into pre-existing security platforms such as MS Sentinel, IBM QRadar, Splunk and VMware.
- Output aligns with pre-existing internal processes.
- O No false positives, is based on fact and verified by law-enforcement.

Already securing major global corporations and public services in over 110 countries.

## Current statistics and trends.

1/500 company computers are utilised to consume child sexual abuse material (CSAM).

**64%** of all organizations have experienced a case of CSAM in the last 5 years.

**59%** of senior IT leaders thought it was likely the dark web could be accessed undetected on their company IT assets.

**50%** involve laptops and in 50% of the cases other highrisk material is found.

#### **DETECTS COMPROMISED ASSETS**

# Cybersecurity challengers and changemakers.

We are industry challengers with a crystal-clear mission; to help CISO's protect their organizations from known threats today overlooked by all other security solutions. Our experience addressing the threat that child sexual abuse material (CSAM) poses to businesses is long and profound, and we work closely with our partners and customers to ensure continued innovation and product development.
