Special

Enter the Azure Cloud world. Fast!

As a Certified Microsoft Gold Partner, we enable you and your team to get started quickly with Azure Cloud. In six structured workshops, we clarify terminology, cloud concepts and architectural approaches while focusing on the most important components of the Azure Cloud.

You will benefit from our long experience with Azure when discussing topics such as Landing Zone, Network, Security and Identity Access Management. Our main goal is to develop a common view on Azure cloud technologies, so you can make appropriate decisions from the beginning of your cloud journey. The discussions and decisions are documented and recorded in a comprehensible manner, resulting in an Azure architecture tailored to your business requirements. Our approach is flexible and adapts to your needs, discussions and requirements. Finally, a PoC environment will be built that can host test applications or be used by engineers as a learning and training tool.

YOUR ADVANTAGES

- Quick and pragmatic entry to Azure Cloud
- The workshop also serves for training
- The process is flexible and adapts to your needs
- After completion, your Azure environment is ready

Start now!

Benefit from our long-term experience. With us, a trusted Azure partner of many years, your vision is in good hands.

Contact **Beat Schaufelberger** for more information or a customized offer at **schaufelberger@netcloud.ch**

Our workshops

Workshop 1: Overview and introduction
- Cloud terminologies and concepts
- Design principles in the cloud

Workshop 2: Focus on connectivity
- Connectivity to Azure
- Netzwork within Azure
- Netzwork security
- IP address concept

Workshop 3: Focus Security
- Security structures with Azure
- IAM and perimeter security
- Logging, monitoring und key management

Workshop 4: Architecture & PoC planning
- Landing zone, subscriptions & resource groups
- Costs and cost optimizations
- DNS / Active Directory integration
- Definition of target architecture

Workshop 5 & 6: PoC design
- Create subscription / VNETs / subnets / Internet access
- VPN and AD connection, DNS integration
- Introduction Azure CLI
