Orchestrated Eco-system

Execute

20%

Improved ability to mitigate real-time disruptions

30%

Real-time tracking and monitoring of assets

50%

Automate manual processes

“

*Pulse is a real-time enterprise platform enabling **data driven decisions** across highly complex enterprises with multiple stakeholders.*

*Gather and distribute data through a unified domain model and allow all your stakeholders to take **collaborative actions in real-time**, and via one **single source of truth**.*

*While keeping existing system landscape intact, **innovation** can be added directly in Pulse, this allows businesses to **adapt** with the pace of change, swift and with **low risk**.*

Mehdi Motaghiani
Partner

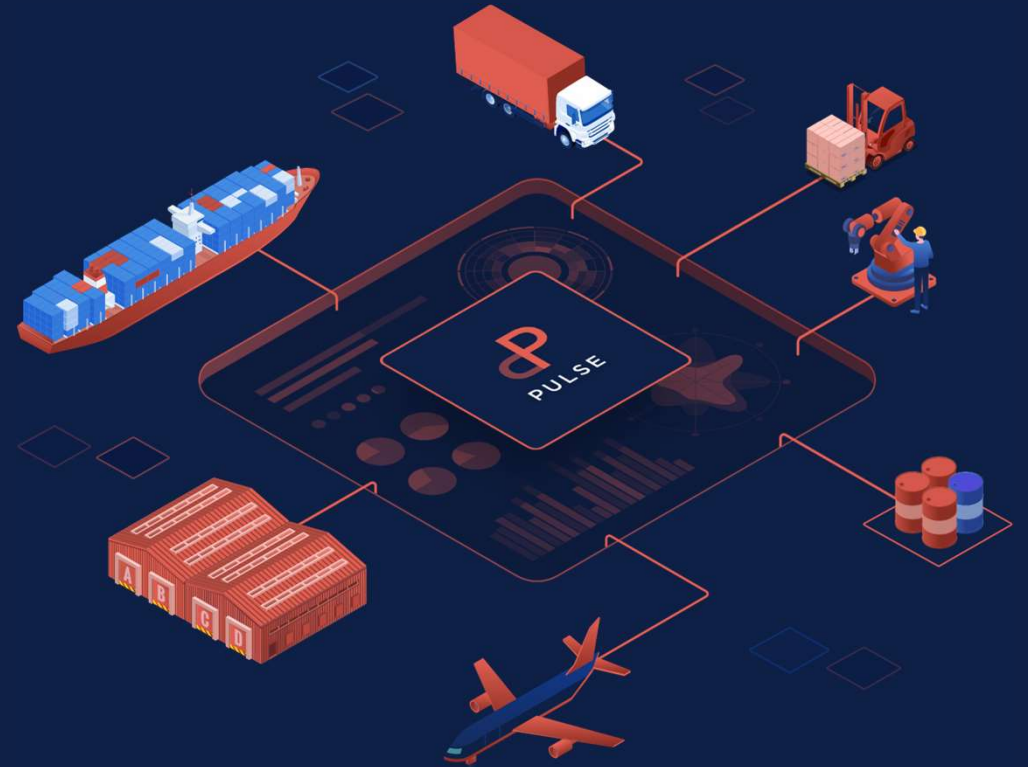

Global Head of Transportation & Logistics

netcompany

Align your business in one platform

Gather, process and **distribute data, in real-time**, across your business landscape via a unified domain model, ensuring end-to-end alignment and transparency for **optimal decision making**.

Empower stakeholders with a unified UI

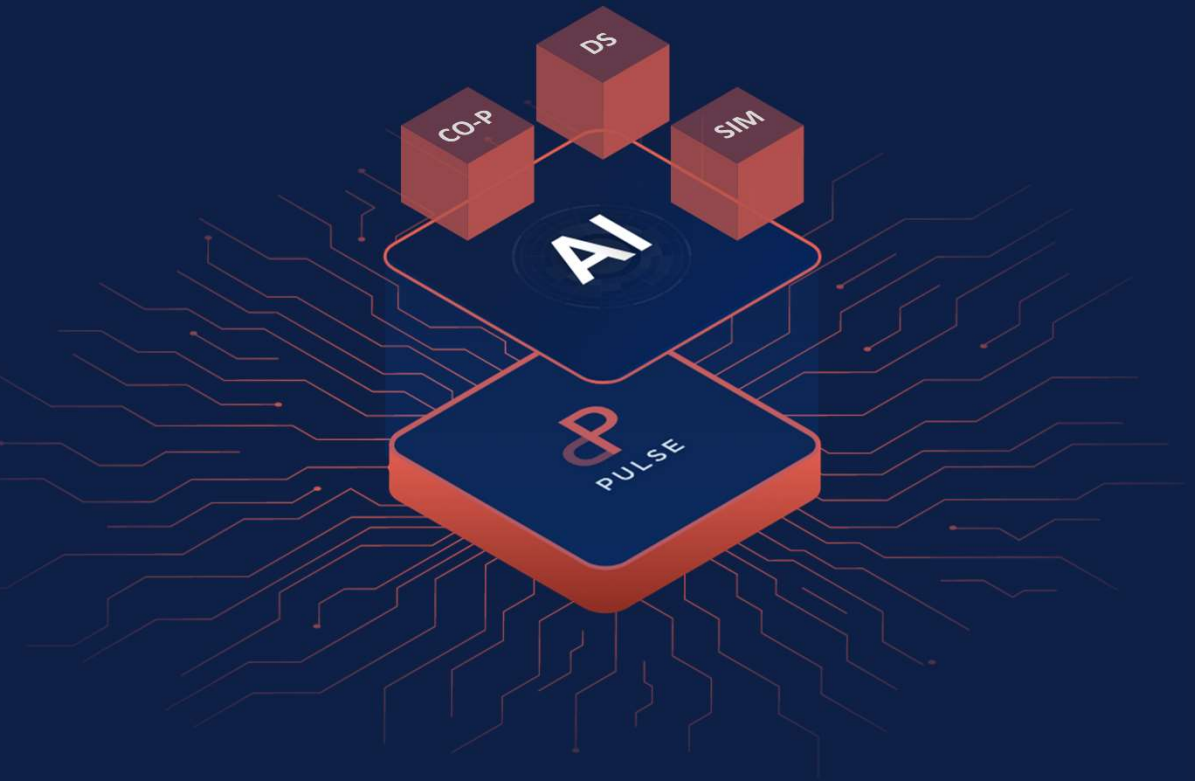

Allow stakeholders across your
business landscape to collaborate with
a **single source of truth**.

An advanced permission model
ensures data security and allows for
individual customization.

Predict & Automate with machine learning

By continuously collecting rich contextual data across your eco-system, a **solid foundation for applying learning models** is provided - enabling you to unlock the benefits of intelligent decision support, predictions and automation.

Innovate rapidly with configuration

Build, test and **release with speed**.
Fluid configuration and frequent updates
replace big bang releases. Flexible modules
can be assembled and re-assembled for **faster
adaption to new needs and opportunities**
giving you a competitive advantage.
