

# Define your organization's digital transformation roadmap with Net IT

## ABOUT NET IT:

Net IT helps organizations work smarter, improve customer experiences, and gain actionable insights from data. We specialize in delivering business applications and CRM solutions via Microsoft Dynamics 365 and Power Platform.

### *What our customers are saying*

*"Business is done by people with the right cultural fit. With Net IT, we were able to speak the same language."*

*– Hans Steenbreker, IT Director, Vasco Group*

## WHAT WE OFFER

Our first step is to understand your organization's goals, challenges, and opportunities. Analyze how your people currently work, and what can be improved. Translate your strategic goals to innovative and future-proof business applications that enable your organization and every employee to be more creative and productive.

Our certified business analysts then apply Microsoft Catalyst, a proven design-thinking methodology based on Microsoft cloud, Dynamics 365, and Power Platform technologies for defining digital transformation roadmaps.

As a result, you'll have a clear view of the business value and investment costs required when digitally transforming your organization. We'll also deliver a feasible plan that enables you to confidently move toward a successful future.

# Why Dynamics 365?

## Modern applications

Modern applications that deliver new experiences and connect with a businesses' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

## Unified data and processes

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

## Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

## An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.
