Do you want to manage much more than customer relationships?

If the existing capabilities and services of your CRM system do not meet the specific needs of your business, you want to quickly create a customized line of business applications.

CHALLENGES

When you reach the limits of the out-of-the-box capabilities of your CRM system, you need to be able to quickly extend the capabilities and services of your business applications.

IDEAL SOLUTION

Microsoft Power Platform allows you to quickly create business applications that suit your organization's specific needs. Our digital solutions really support your business and people.

DESIRED OUTCOMES

By leveraging the Microsoft Power Platform, Net IT helps you to optimize, model and implement digital solutions that fit your specific business needs.

Microsoft Power Platform

By leveraging the Microsoft Power Platform, Net IT helps you to optimize, model and implement low code business applications that your people are happy to work with and that support your business.

1

360° view on your business

Break down silos in your organization with a 360° view on customers and any stakeholder.

2

Quick time to market

Rapidly build and rollout (mobile) apps and web portals for specific business purposes.

3

Integrated with your CRM system

Integrated with your sales, marketing and service apps in Microsoft Dynamics 365.

Net IT business app development expertise & Microsoft Power Platform

Build digital solutions to manage everything. Any business process can be modeled and implemented thanks to the flexibility of Microsoft Power Platform, the low code application development platform incl. Microsoft Power Apps, Microsoft Power BI, Microsoft Power Virtual Agents and Microsoft Power Automate.

Fully integrated

Cloud business apps that are fully integrated with your other Microsoft business applications.

Any channel, any device

Interact with people via all channels (e-mail/chat/website/social/voice) and any device (mobile/tablet/PC).

Ready for the future

Built on a platform that delivers on the promise of meeting future business needs.

Customer success: Vasco Group has a 360° customer view

Thanks to Microsoft Dynamics 365, sales people at Vasco Group have a 360° view on customers and follow-up on projects. Advanced sales reporting in Microsoft Power BI provides a direct access to the latest revenue numbers. With the mobile app in Microsoft Power Apps, Vasco Group manages showroom inventories.

Increased sales efficiency

An optimized and more goal-oriented way of working for the sales department. The 360° customer view provides all needed information.

Faster administrative processes

Together with Net IT, Vasco Group remodeled administrative processes and installed a new digital workplace.

Realtime sales reporting

Vasco Group has a realtime view on what happens at every customer and is able to react quickly to changes.

Work smarter. Engage your customer. Turn data into action.
