**Can clouds brighten your  
digital future?**

**Cloud Discovery Workshop**

the perfect start  
for your cloud transformation

# Cloud Discovery Workshop

Based on the best practice approach and our extensive experience, we will take your decision-makers through specific application scenarios to highlight how the cloud can help you meet your needs when it comes to agility, innovation and cutting costs. We will cover the transformation of both infrastructure and applications to the cloud.

## Target group

You should set aside at least half a day for this workshop and ensure that the relevant decision-makers are involved. The workshop is aimed at ambitious SMEs that clearly desire change. For the workshop to be successful, it is important that both business and IT representatives take part.

# How you benefit

**Systematically recording of business requirements**

**Developing a potential cloud strategy & cloud architecture**

**Recording & assessing the current status**

**Outlining a choice of platform-independent courses of action**

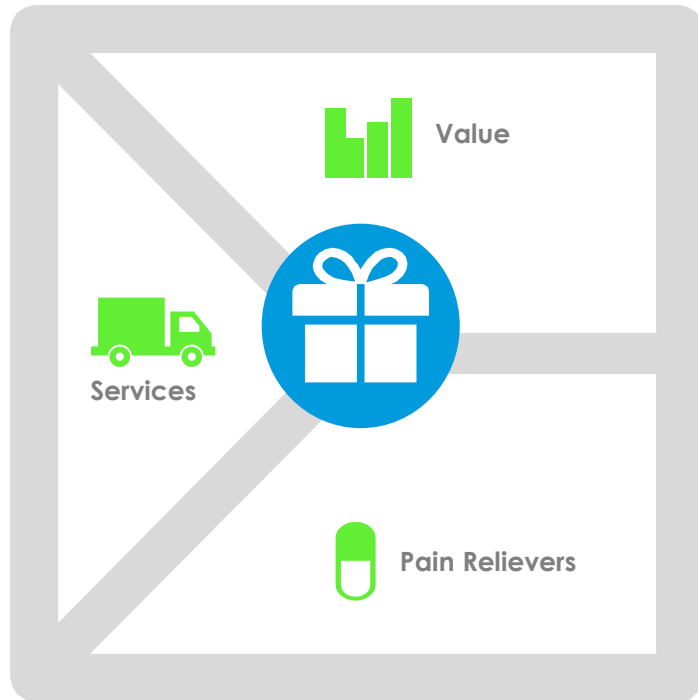

**Creating a potential transformation road map**

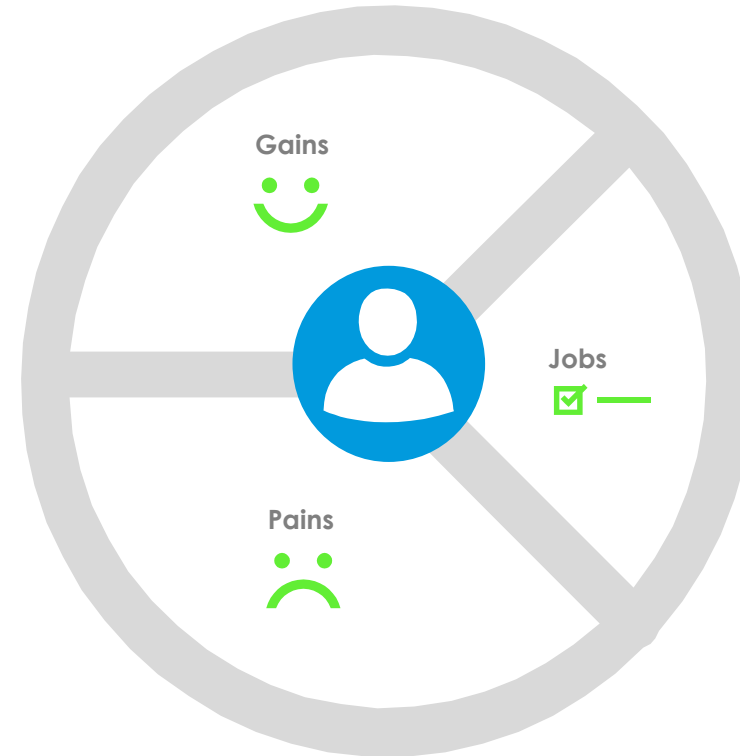

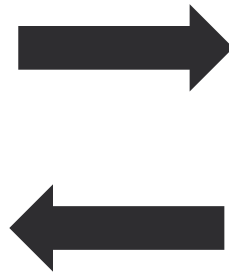

**Minimal time investment**

# Canvas Value Proposition Model

**«The Cloud Discovery Workshop helped us to push the cloud discussion forward.  
We now understand the relevant consequences  
and this will help us to make an informed decision.»**

**Thomas Salzmann**

Head of IT Infrastructure at Gösgen Nuclear Power Plant
