

# Microsoft Azure Virtual Desktop Proof-of-Concept

Today, it's critical for businesses to streamline remote work strategies for their teams. With Azure Virtual Desktop, get the most productive and most secure computing experience for users while lowering total cost of ownership and reducing complexity for IT teams. *Companies using Azure Virtual Desktop have been able to reduce IT costs by 59% and VDI licensing and infrastructure costs by up to 34%.\**

## Deliver the only multi-session Windows experience

Fully managed, always up-to-date Windows experience, available virtually anywhere, on any device

## Built-in intelligent security

Ensures security and compliance with proactive threat detection and remedial action

## Deploy and scale in minutes

Unified admin interface, along with dynamic load balancing and familiar tools to customize set-up

## Reduce cost using existing licenses

Use eligible Windows or Microsoft 365 licenses to access AVD and pay only for what you use

## Build your virtual workspace with confidence

Netrix is a leading Microsoft partner. Centered around best-practices implementation methodology, our PoC engagement will help you understand the functional, technical, and security capabilities of the solution.

### What we cover in the PoC

 **Duration: 4 Weeks**  **Cost: \$15,000**

#### Envision

- Deep dive session to understand your current environment: Desktop vs published applications and personal vs pooled desktops.
- Identification of high-level VDI use case.

#### Plan

- Review of "Master\Golden Image" requirements.
- Plan for Azure Virtual Network and Azure Virtual Desktop configuration.

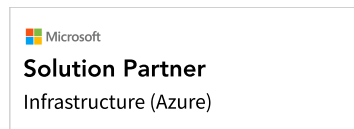

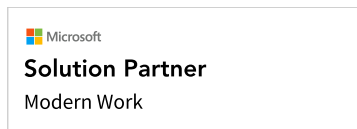

#### Build

- Deployment of the required resources: Resource Groups; VNets; Master/Golden Image; Workspaces; Host Pool

#### Prepare and Share

- Validation of interoperability between Cloud AVD resources and your AVD workspace.
- Transfer of the environment, along with design documentation with your team.

**Netrix can take your Microsoft-powered infrastructure to the next level, providing you the engineering and services expertise to help you customize, automate, and analyze your entire environment.**
