

# Azure Foundation Assessment

## Solution Overview

The Azure Foundation Assessment provides a review of your server footprint using tooling such as Azure Migrate or Move. At the end of the assessment, you will have a breakdown of what it would cost to run workloads in Azure and a high-level implementation plan on how to migrate securely.

### 1 ASSESSMENT PREP

Netrix will assist with the installation and configuration of the data gathering tool, such as Azure Migrate or Move, in order to assess and analyze your current environment.

### 2 WORKSHOP SESSION 1

In the first session, our team will cover a high-level review of the assessment findings, identify the top one to two Pilot apps for migration, review IaaS, PaaS, and SaaS deployment types as migration targets, and map your top Pilot apps to target deployment types.

### 3 WORKSHOP SESSION 2

During the second session, we'll review the pricing options for all services and deliver a total cost of ownership (TCO) to migrate Pilot apps based on our initial data analysis.

### 4 WORKSHOP SESSION 3

During session three, our team will work with you to determine the best resource targets for initial migration, including:

- Servers with OS that are EoS
- Servers on aging hardware
- Infrastructure as a Service (IaaS) resources
- Disaster Recovery and Backup
- Pilot Apps

### 5 WORKSHOP SESSION 4

In the final session, our team will help to design Azure Landing Zone.

#### WORKSHOP BENEFITS

1. Best practices for implementing Azure Landing Zone in order to prevent surprise bills and ensure proper security
2. A total cost of ownership (TCO) for moving some or all of your workloads to Azure
3. An actionable plan for migration to Microsoft Azure

#### CLIENT REQUIREMENTS

1. +1 server on-premises and +2 service accounts
2. 2-4 hours per week for the first 2 weeks for configuration and implementation of the data collection tool
3. 1-2 hours per week for the last 2 weeks for workshops and review

#### ENGAGEMENT DELIVERABLES

1. Assessment Results (PPT)
2. Governance & Landing Zone Recommendations
3. Strategy & Planning Workshop
4. Migration SOW
5. Migration Flowchart

## Why choose Netrix?

Since 2005, Netrix has provided engineering expertise, complementary solutions, and supporting services for the Microsoft technology stack. As a Microsoft Gold Partner, we have the expertise to deploy and support your team's new or existing Microsoft infrastructure.
