CLOUD SERVICES

Microsoft 365 Managed Services

Netrix's 24x7x365 managed services for Microsoft 365 combines a reactive service desk with proactive strategic planning to ensure your team is productive and secure.

Single Source of Support for your Microsoft 365 Product Suite

SERVICE OVERVIEW

With Netrix, you gain a single source of support for your Microsoft 365 solutions backed by the leadership and guidance of our Microsoft certified team. Microsoft 365 is a broad ecosystem and with our team you gain expertise across all things Microsoft, including security, user management, Exchange, Teams, and more.

With Netrix Microsoft 365 Managed Services, you get:

- 24x7 Microsoft Premier Support for the complete Microsoft 365 solution

- Monitoring, reporting, patching, and more across the productivity, identity, and end compute solutions

- A centralized billing entity for Microsoft 365 licensing and support

- Usage monitoring and reporting with regular business and technology reviews

- Flexible engagement models to match your specific support needs

WHY CHOOSE NETRIX?

Netrix is a Microsoft Gold Partner that has been referred by Microsoft to execute over 400 projects in 2020 alone. Our team of over 300 technical experts deliver proven solutions that help you attain business goals and empower your organization.

ITS ABOUT MORE THAN JUST TECHNOLOGY

Our approach to technology goes far beyond the hardware and software. At Netrix, we believe that the way your business operates, the goals you have across the organization, and the people that make it all happen are what come first. By having a dual approach, both from a business leadership and technical engineering level, we're able to advise, prioritize, and budget your technology roadmap so your technology decisions align with your own unique business objectives.

AGILITY & FLEXIBILITY

Netrix provides the service level and agility of a boutique consultancy with the breadth of a global IT services provider. Our expertise across collaboration, security, and cloud allows us to quickly deploy cross functional teams that solve for any technology challenges.
