Netrix GLOBAL

A Guided Pilot Implementation

Microsoft Defender for Cloud Pilot Engagement
A NETRIX GLOBAL OFFERING

Protect your multicloud and hybrid environments with comprehensive CNAPP security.

Let us help you pilot Microsoft Defender for Cloud (MDC) to strengthen your security posture, enable protection against cyberthreats, and reduce risk throughout your cloud application lifecycle. As an expert in Microsoft Azure and cloud security, Netrix is well-equipped to guide you through an MDC pilot to help you fully understand the benefits and capabilities, and plan for a full-scale deployment.
What to expect.

A four (4) to six (6) week, fast-paced engagement that includes time with our cloud security experts to work through a three (3) phase process.

o   Plan & Envision: Based on gathered requirements, a plan is developed for the workload onboarding of relevant MDC components.

o   Build: Deploy the prerequisites, configure Defender elements, and onboard resources.

o   Prepare: Review Microsoft Defender for Cloud dashboard to showcase findings and capabilities; discuss best practices and considerations for broader rollout.

Who is this for?

o   IT professionals responsible for Cloud Security or hybrid workload protection

o   CIOs and technology leaders that need to understand the full capabilities of a Cloud-Native Application Protection Platform (CNAPP)

What do you get?

o   Microsoft Defender for Cloud guidance.

o   As-built documentation of the configured solution.

o   Pilot implementation including workload protection of MDC elements (chosen by client):

✓   Defender for Servers

✓   Defender for SQL

✓   Defender for Storage

✓   Defender for Containers

✓   Defender for Key Vaults

✓   Defender for APIs

✓   Defender External Attack Surface Management (EASM)

✓   Defender CSPM

✓   Defender for AWS Accounts

✓   Defender for GCP Projects

o   Export and discussion of Defender for Cloud findings and recommendations
