

# Windows 11 Readiness Assessment

Today, our work devices have become even more central to our lives. As we continue to work remotely, we not only need to be productive but also feel secure from the growing cyberattacks.

Windows 11 meets these new demands head-on, allowing everyone, from end-users to IT, to stay productive, while at the same time reinforcing your security posture.

## Exceptional experience

Cuts through the complexity with simplified design, personalized experiences, and instant collaboration capabilities

## Secure by default from chip to cloud

Most secure Windows yet with zero-trust security across hardware, identity, and applications

## Simplifies IT management

Built on the same Windows 10 foundation with 99.7% application compatibility and a familiar management experience

## Kickstart your move to Windows 11 with confidence

Leverage Netrix's deep Microsoft expertise to evaluate your current environment and chart a path forward to modernizing your Windows.

### Envision

Get an overview of the key capabilities of Windows 11

### Assess

Understand your readiness with an assessment of your existing environment, as per a pre-defined assessment checklist

### Share

Get documented results of the assessment, along with recommendations for final deployment

 **Duration: 1 Day**

 **Cost: \$4,000**

Netrix can take your Microsoft-powered infrastructure to the next level, providing you the engineering and services expertise to help you customize, automate, and analyze your entire environment.

 **Advanced Specialization**  
Identity and Access Management | Microsoft Threat Protection | Adoption and Change Management | Windows Virtual Desktop
