

MDR - Managed Detection and Response

Getting Started - January 2025

Microsoft Azure Marketplace

Step 1 - Filling out plan details

Create or select an Azure Resource Group with a clear and standardized name.

Subscribe To MDR - Managed Detection and Response

Subscribe to plan

*** Basics** Tags Review + subscribe

Fill out the plan details. After you've finished subscribing, configure your SaaS account on the publisher's website to complete the process.

Project details

Select the subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.

Plan

Netsecurity MDR - 1-month subscription

Netsecurity MDR SaaS solution offers a transparent billing model based on the number of active users in your tenant. This ensures fair billing by excluding inactive users, unlicensed users, and other non-active accounts.

Our solution is designed for Microsoft 365 environments. The following licensing is supported:

- Microsoft Business Premium.
- Microsoft 365 Education: A3+A5 Sec and/or A5.
- Microsoft 365 Frontline: F3+F5 Sec and/or F5 Security.
- Microsoft 365 Enterprise: E3+E5 Security and/or E5.

Step 3 - Filling out plan details

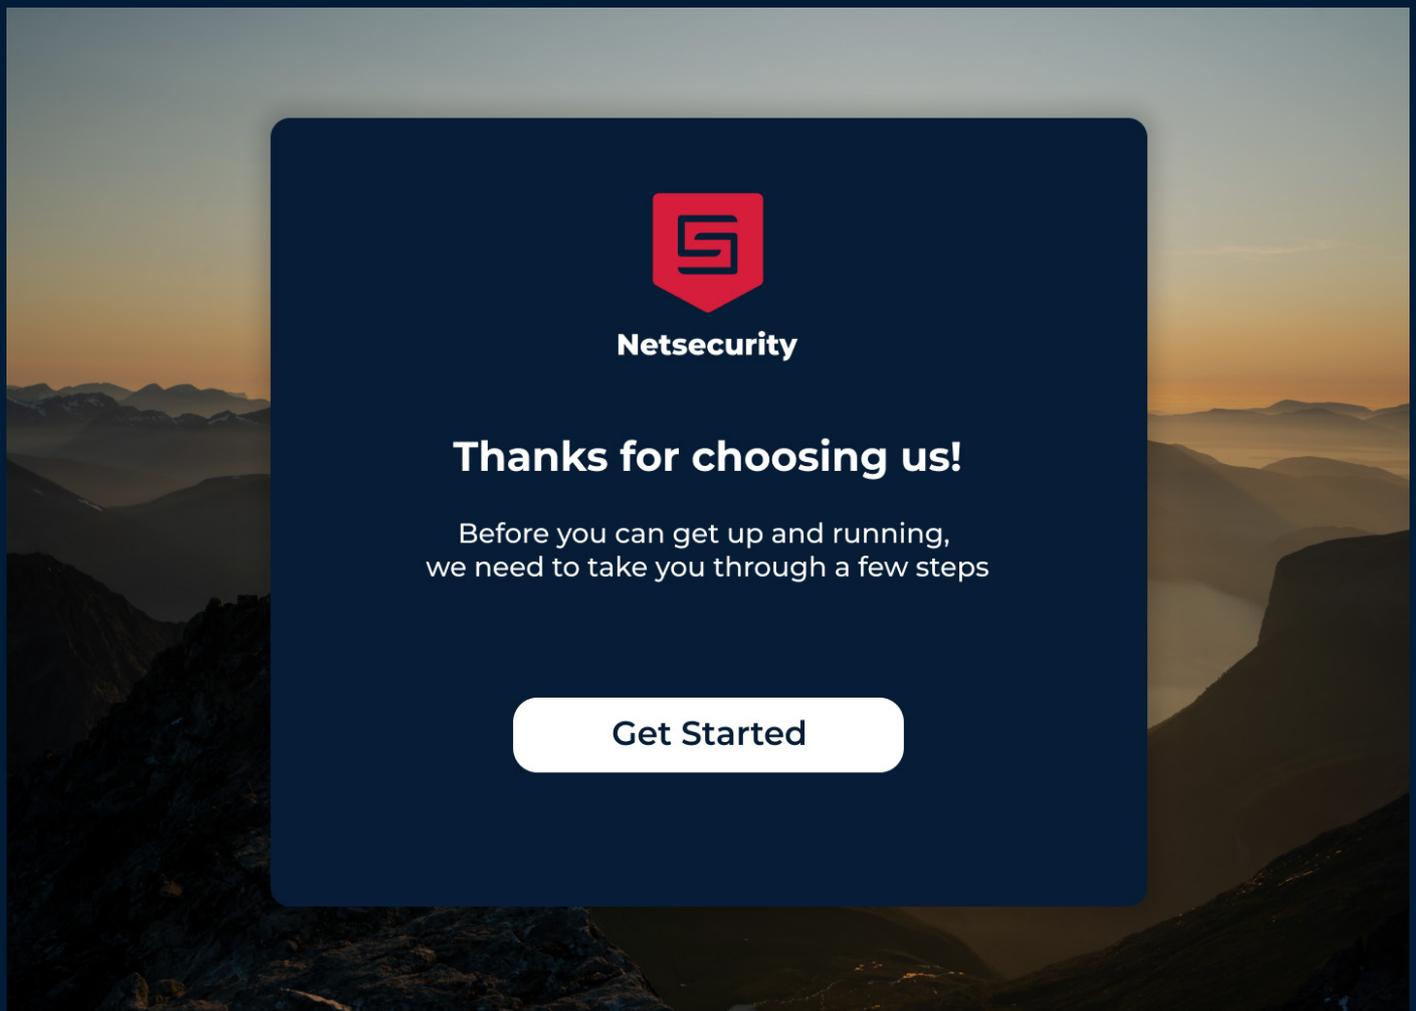

Verify that recurring billing is turned on to avoid automatic cancellation of the SaaS offer at the end of the billing cycle

Billing term ⓘ	1-month subscription
Number of users (1-100000) *	<input type="text" value="100"/> ✓
Subtotal ⓘ	Contact publisher for pricing details
Recurring billing ⓘ	<input checked="" type="radio"/> On <input type="radio"/> Off

Step 4 - Landing Page Confirmation

- After acquiring the SaaS offering, you will be redirected to a landing page to configure the account. During this process: Do not close or refresh the page until the configuration is complete.
- Verify that all required fields are completed correctly

Step 5 - Email Address confirmation and accounts

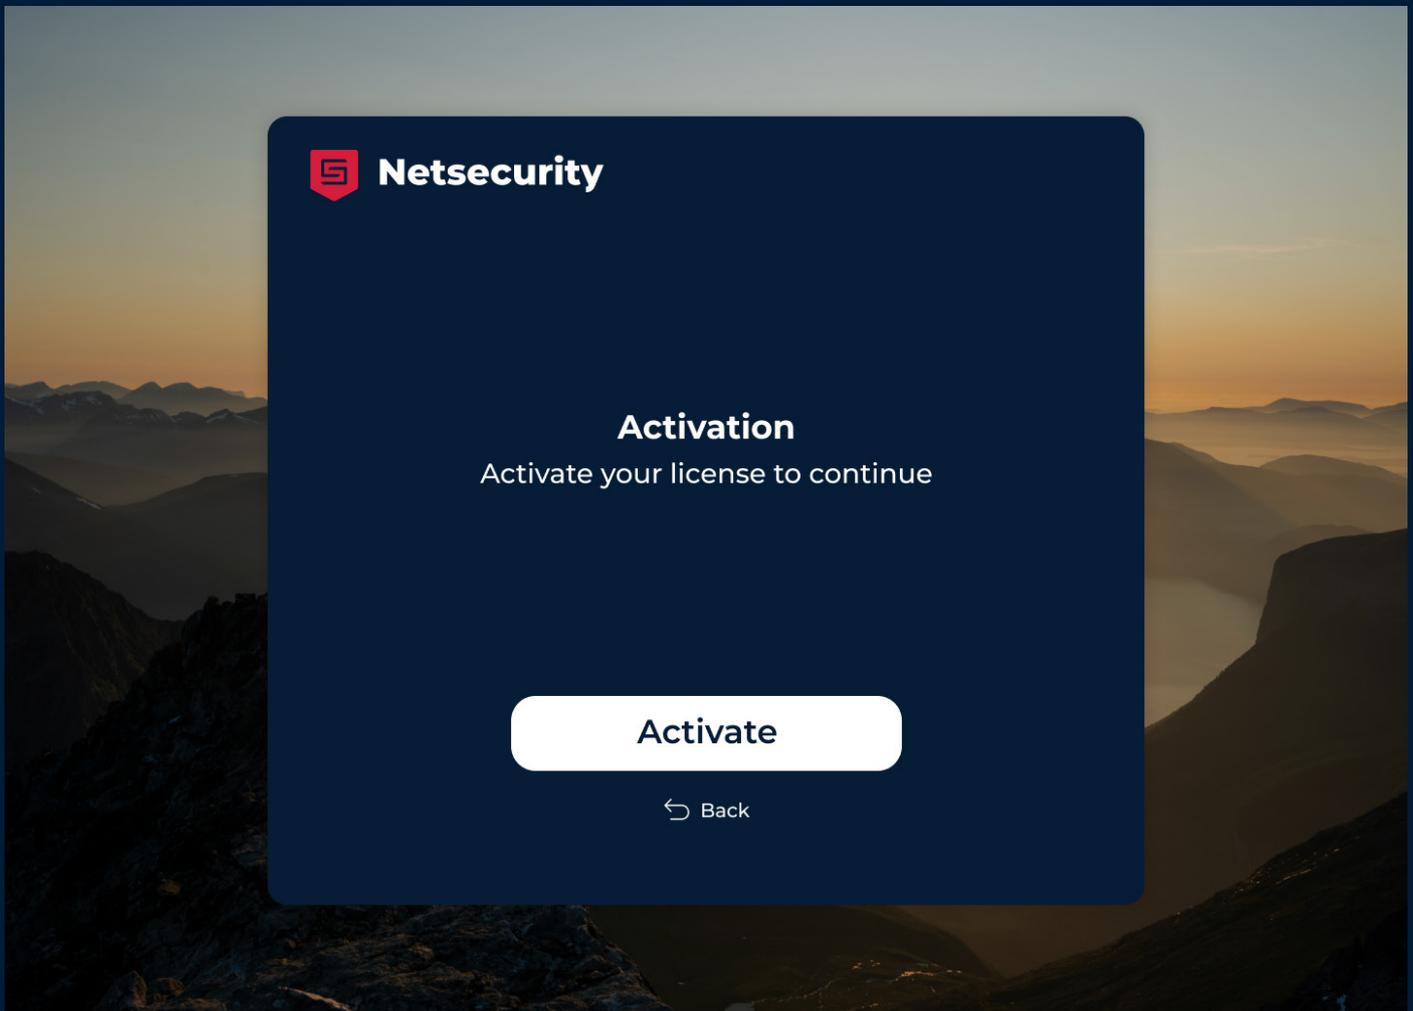

Ensure the email is accurate to receive alerts and confirmation emails. Additional user accounts can be added after the initial setup to provide access to the portal and manage the SaaS solution

The image shows a dark blue modal form for Netsecurity. At the top left is the Netsecurity logo, which consists of a red shield with a white 'S' and the word 'Netsecurity' in white. Below the logo is the title 'Contact Information' in white, followed by the subtitle 'Confirm or update your information'. There are two input fields: 'Name*' and 'E-mail*', both with white outlines. Below the input fields is a white rounded rectangular button labeled 'Continue'. At the bottom center is a white arrow pointing left followed by the text 'Back'.

Step 6 - Activating your license

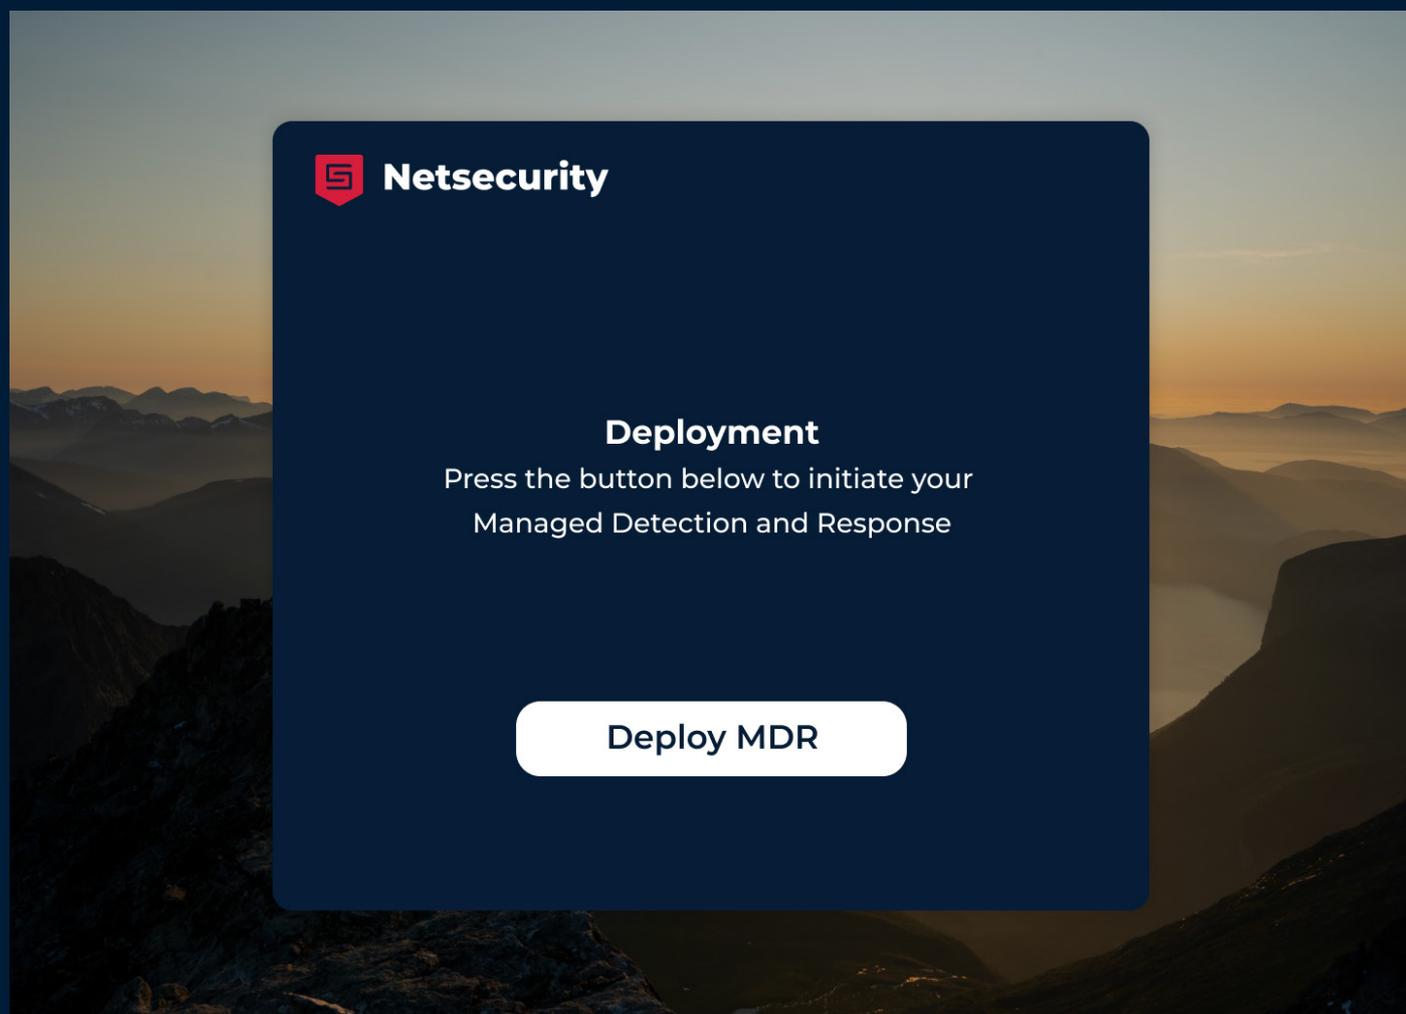

In order to continue the onboarding process you will need to activate your subscription which will allow us to register you as a customer.

Step 7 - Enterprise Application Authorization

During the landing page configuration, the Global Admin will be prompted to authorize an enterprise application.

The solution's security and operational requirements necessitate an extensive list of permissions. These permissions are critical to enabling the Managed Detection and Response (MDR) solution to function effectively and deliver its full capabilities.

Step 8 - Completion Screen

Once the configuration is complete, check that a confirmation email is received. If no confirmation is received, or if any issues occur during the setup, please contact support.
