classroom.cloud

Easy breezy, low-cost, classroom management and teaching platform for schools

Education Alliance Finland

CERTIFIED
PEDAGOGICAL QUALITY

Forget EdTech fatigue... we're all about simple yet essential teaching tools to monitor and instruct in classrooms *and* with remote learners.

That's why teachers choose **classroom.cloud.** Its cloud-based teaching tools help deliver engaging and meaningful learning experiences for students in a safe online environment.
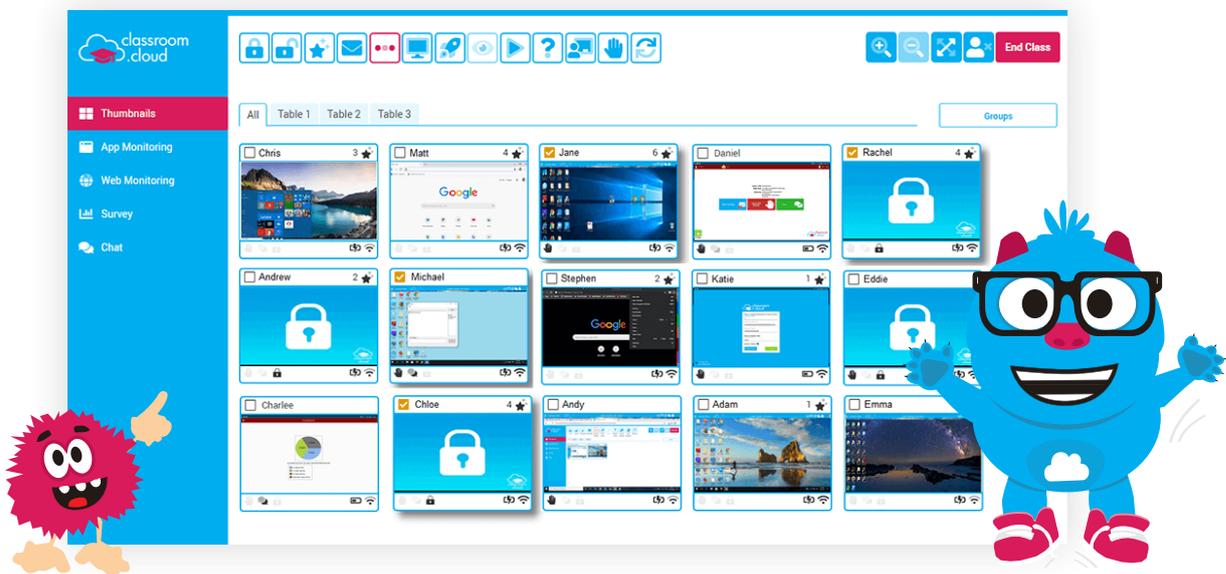

Key features

Connect to students' devices quickly and easily by a range of methods to get started with teaching and learning straight away.

Broadcast your screen and audio to connected students to help show/talk them through explanations and lesson activities.

Interact with students in real time via chat and messaging tools, answer help requests, gain instant feedback on topic understanding with class surveys, remote control their screen, and more!

Monitor students' screens, see what they're typing, and who they're collaborating with - plus view their web and application use in real time to ensure they're on task.

Gain attention by locking students' screens for maximum focus while you explain the lesson activity.

Stay focused with 'allowed' and 'restricted' website/application lists to ensure students can only access relevant and appropriate websites during class.

NEW: Stay safe at all times with the new online safety toolkit, helping keep your online environment protected by monitoring concerning activity, identifying students at risk and spotting online safety trends.

Use with your already-established Microsoft SDS, ClassLink or Google Classroom platforms for maximum flexibility and to save time when setting up your technology-led lessons.

Multi-platform support for use with a mix of devices ensures your school is future-proofed and can simply roll with the ever-changing tech landscape.

Learning continuity is ensured, whether in school or remotely, with one set of clear, consistent tools.

Scalable from the smallest school to the largest District!

Low cost, low maintenance and cloud-based - win, win, win!

classroom .cloud

Our teaching tools make it easy to lead learning, no matter where you are - and they're simple to maintain too!

Easy for teachers

The easiest classroom tool you'll ever use, **classroom.cloud** lets you demonstrate, monitor, control, and collaborate with your students to deliver super-engaging, interactive lessons that will keep them immersed and on target for success.

Easy for technicians

Easy to set up, configure, manage, and use, **classroom.cloud** virtually takes care of itself! Integrating directly with your existing infrastructure, you can deploy in minutes and manage teacher and student devices centrally – saving you a bunch of time.

Easy for schools and districts

Low cost and scalable, with clear central configuration and management, **classroom.cloud** is ideal for school districts. Once set up, the IT team's involvement is minimal – and, for teachers, using its intuitive interface is a breeze!
