

# Netways delivers hassle-free Microsoft Azure resource deployment and lowers change failure rate by 50%

**“We’ve witnessed a significant reduction in deployment times, improved resource utilization, and enhanced collaboration between development and operations teams. Microsoft's commitment to providing robust IaC solutions has been a key driver of our success in modernizing our customers’ infrastructure.”**

**Mohammad Beydoun, Global Engagement Director, Netways**

## Highlights

Efficient infrastructure management and automation help cut costs and streamline digital transformation

Significant reduction in deployment time and improvement in resource allocation

Enhanced collaboration between development and operations teams boosts performance and productivity

## About partner

With over two decades of proven expertise in delivering turnkey solutions based on Microsoft technologies, Netways helps organizations accelerate their digital transformation. Headquartered in Riyadh, Saudi Arabia, Netways serves more than 2,500 customers through 12 global locations, with a solid presence in the MENA region and in North America.

## The challenge

Traditional infrastructure management can be an expensive and challenging undertaking, involving manual configuration and provisioning, lack of version control, scalability challenges, and inconsistency across environments. Customers needed efficient infrastructure management processes to minimize inefficiencies and maximize the use of resources.

## The solution

By designing and implementing secure and scalable solutions on Microsoft Azure, Netways IAC Mastery service delivered hassle-free Microsoft Azure resource deployment, lowered change failure rate by 50 percent, and helped customers cut costs by 40 percent. Organizations also reported recovering from incidents 24 times faster than before.

## The results

- Netways IAC Mastery service automates provisioning and configuration of Microsoft Azure infrastructure components, ensuring consistency and repeatability. It also provides version control and dynamic scaling based on demand.
- Netways’ service guards against negative impact of failed changes, helping organizations recover from incidents 24 times faster and lower change failure rate by 50%.
- Customers are no longer stuck with hardware expansion problems such as disks, storage, electricity, and network switches. With just the push of a button, all these elements can be effortlessly integrated, allowing for seamless operation and reduction in costs.
