15

Years on global market

7x

Microsoft Partner of the Year

Netwise is an award-winning CRM systems integrator in Europe, operating since 2008

A system created by Netwise, based on Power Platform, Dynamics 365 and Azure for one of the clients, become one of the most popular case studies from Microsoft in the world.

Dynamics 365

Customer Service

Marketing

Sales

Copilot

Power Platform

Project Operations

Power Automate

Power BI

Increase efficiency and reduce costs with Microsoft Dynamics 365 automation!

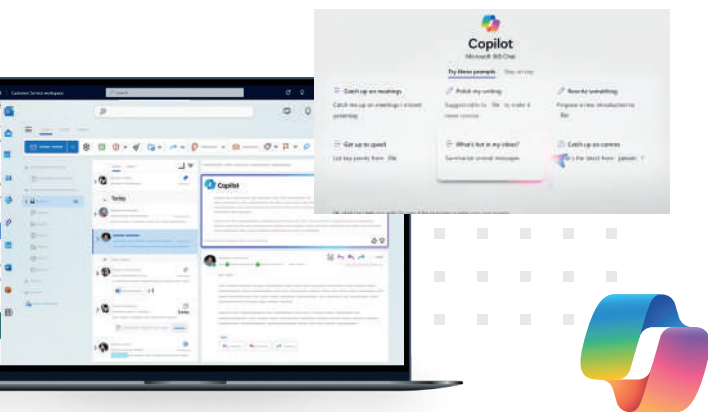

Discover the power of business processes automation

Business processes automation is one of key features of Dynamics 365, which enables companies to increase their efficiency and reduce costs.

Personalized communication with a Customer

Build true relationships with your Customers based on understanding their real needs.

Advanced automation supported by AI and Machine Learning

By using artificial intelligence (AI) and Machine Learning you can achieve advanced process automation in your organization in areas such as sales, marketing, customer service, finance and operations.

Microsoft Copilot - Your virtual assistant

Thanks to Microsoft Copilot, consultants can effectively utilize information about leads, create email content based on CRM data, generate conversation transcripts with key segments highlighted, and use suggestions during sales conversations. And all of this is possible with one tool!
