# Solving Business Challenges with Technology Solutions

## About Azure Cloud Migration Assessment:

Networking Planet is in the business of crafting game-changing solutions to modernize your company. We focus on every area of digital optimization and share our expertise, to improve the way your organization lives online. Our purpose is to ensure that you get the most out of your IT investment and drive your business forward.

## What we offer

Networking Planet is ready to help assess and migrate your environment into Azure. The assessment will focus on analyzing the current workloads and present the best options for migration and modernization.

- \* Servers, databases and web apps: Assess on-premises servers including web apps and SQL Server instances and present options for migration to Azure virtual machines or Azure VMware Solution (AVS).
- \* Databases and Data: Assess on-premises SQL Server instances and databases to migrate them to an SQL Server on an Azure VM or an Azure SQL Managed Instance or to an Azure SQL Database. Migrate large amounts of data to Azure quickly and cost-effectively using Azure Data Box products.
- \* Web applications: Assess on-premises web applications and migrate them to Azure App Service and Azure Kubernetes Service.
- \* Virtual desktops: Assess your on-premises virtual desktop infrastructure (VDI) and migrate it to Azure Virtual Desktop.

Completion of the assessment will have a step by step plan provided by a senior architect to migrate and operate in Azure using the Microsoft Cloud Adoption Framework. Proven guidance and best practices that help you confidently adopt the cloud and achieve business outcomes.

## What our customers are saying

“Networking Planet has always provided us the tools and methods to leverage the cloud the right way. They have the deep expertise and the staff to execute projects both on-time and on budget.”

– Scott Draizin, CEO, Headsup Industries

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
