Adoption of Microsoft Fabric in Your Business. The Process & Benefits: 2Hrs Briefing

About Netwoven

We create and implement digital transformation strategies around secure collaboration, modern software applications, deeper insights from data, modern infrastructure and security using the Microsoft Cloud.

What we offer

Microsoft Fabric is the most comprehensive all-in-one analytics platform designed for organizations that covers everything from data storage and data movement to data science and real-time analytics.

Netwoven has been partnering with Microsoft from early days of Fabric preview releases and developed deep expertise on capabilities of all Fabric workloads and adoption strategies for different data analytics use cases.

Netwoven is offering expert consulting service in packaged formats to help enterprise with assessment of their data analytics technology stack and data culture for potential Fabric adaptability.

- Short briefings on Microsoft Fabric adoption
- 3 days' workshop on assessment and Fabric adoption strategy
- Pilot adoption of Fabric (4 Weeks)

What our customers are saying

"They have been exceptional in delivering projects on-time with a high degree of quality"

– Steve Cowan, Sr. Director, Application Infrastructure Services

Albertsons, LLC.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

◼ Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
