

Microsoft Purview Information Protection

Better protect your sensitive information—anytime, anywhere.

Microsoft Purview Information Protection helps customers protect their sensitive data – wherever it lives or travels. Microsoft Purview Information Protection enables you to discover, classify and label, protect and monitor sensitive information across a variety of locations including apps, devices, cloud services and on-premises repositories. You can customize your classification and labeling taxonomy to meet your specific needs and apply a range of protection actions to your data based on its sensitivity – such as encryption, access restrictions, or visual markings. Microsoft Purview Information Protection helps you meet your internal security goals and external compliance requirements.

How Netwoven Govern 365 integrates with Microsoft Purview Information Protection

Govern 365 is built on and for Microsoft Purview Information Protection. Govern 365 leverages Microsoft Purview Sensitivity Labels in the securing and sharing of sensitive content, both internally and externally. Govern 365 provides a singular turnkey Purview Information Protection implementation, providing security-isolated/constrained content protection that keeps perfect alignment with effective content access control permissions. With a powerful and flexible New Workspace request and templating capability, Govern 365 empowers admins to provide users with an informative menu-based request process, thereby boosting employee productivity, reducing cycle times, and ensuring good data citizenship through end-to-end compliance with organizational information management and protection policies.

Customer Benefits

- Govern 365 allows you to create unlimited virtual data rooms within your Microsoft 365 tenant to protect sensitive information
- Leverage built-in content protection to collaborate securely with your customers, suppliers, and partners
- Track user activity utilizing rich analytics within a data room for enhanced data security
