Netwrix Usercube

Secure Your Identities to Secure Your Data

Make the onboarding and offboarding of team members secure and consistent and remove the risk of human error by automating identity management workflows with rules customized to your specific requirements. Reduce the risk of unauthorized access by monitoring permissions across the enterprise and getting notified when changes are made that might compromise sensitive data. Netwrix Usercube enables organizations of all sizes to enhance their security and compliance posture by ensuring that access permissions are granted only to those who need them.

STRENGTHEN SECURITY

Reinforce your organization's defense against cyber threats with comprehensive identity management automation and monitoring capabilities, ensuring that access permissions are meticulously managed following the least privilege principle.

SIMPLIFY COMPLIANCE

Ensure adherence to regulatory standards and alleviate the compliance burden by automating compliance tasks and enabling data owners to conduct regular reviews of access rights, approve or deny access requests, and furnish compliance evidence.
INCREASE PRODUCTIVITY

Improve efficiency with automated provisioning, reprovisioning, and deprovisioning of user access for systems, applications, and data. Empower business users to contribute to access management and governance, alleviating the workload of IT teams.

CUSTOMER FEEDBACK

"Usercube is a central building block of our IS and allows us to manage our IAM and IAG needs efficiently, quickly and simply. The performance and openness of their platform combined with a simplified implementation, thanks to SaaS, are strong elements that allow us to gain in agility and security in our rights management operations."

Key Features of Netwrix Usercube

EASY ACCESS REVIEWS

Ensure that users can access only the data and applications they need by putting access review in the hands of the people who know who should have access to what.

ACCESS REQUEST AND APPROVAL WORKFLOW

Enable users to request access to systems, applications and data, and data owners to easily approve or deny those requests, all through a friendly UI.

REDUCED OVERHEAD

Save business and IT teams valuable time by automating the process of provisioning, reprovisioning and deprovisioning user accounts across your IT ecosystem.

CONSISTENT POLICY APPLICATION

Automate the application of access policies across the organization with rules that apply policy consistently to all identities as required.

ACCESS CERTIFICATION

Be confident that you are in compliance with regulations by enabling data owners to regularly certify that users have only the access they currently need.

REPORTING AND ANALYTICS

Maintain oversight of your identity governance and easily get the supporting data you need to prove compliance with an extensive set of customizable reports.

SCALABILITY

The solution scales from small to very large enterprises and covers on-premises and multi-cloud business applications and any type of identities.

CONFIGURE NOT CODE

Netwrix Usercube offers the fastest time to value with connections that are simply configured without the need for coding. This allows the solution to be deployed quickly, without the need for extensive testing and debugging.

A SOLUTION THAT FITS YOU

Netwrix Usercube is highly customizable, easily adapting to fit your IT environment and operating practices instead of requiring you to adapt to it.

ENJOY PROTECTION IN WEEKS, NOT MONTHS

Netwrix Usercube deploys in weeks, not many months, in even the largest organizations, giving you peace of mind that only authorized access to data and systems is permitted.
