KNOWLEDGE MINING & DOCUMENT INTELLIGENCE ACCELERATOR

Automate the extraction of unstructured data to improve productivity, increase accuracy, and reduce cost.

Apply AI with ease to diverse business scenarios at scale with Neudesic Knowledge Mining and Document Accelerator. The accelerator allows customers to efficiently disseminate information to take advantage of opportunities identified. Automating extraction of data and insights from unstructured content greatly reduces the costs and errors of manual content processing

Unstructured Data
- Ingestion
- Enrichment
- Analysis

Insights
- Automate & Orchestrate
- Build applications like workflows, business rule

Outcomes
- Quicker time to market
- Reduced cost of manual processing
- Inbuilt quality
- Optimised, repeatable tools

Neudesic Knowledge Mining and Document Intelligence Accelerator benefits include

|				
Reduce time to market for AI Knowledge Mining solutions by up to 40%	Integrate across all CMS, including Microsoft Teams	Tailored within any application and domain context	Automated setup and configuration	Pre-built ingestion modules that crack documents, split documents, and extract text
Pre-built enrichment modules including classification, forms recognition, table extraction	Pre-built serverless API that encapsulates modules.	Pre-built sample workflow that automates cognitive actions.	ARM templates for all code component	

We partner with clients to develop knowledge mining solutions across all industries, with specific strengths in

Finance

- Automate the review of contracts and due diligence documents for compliance to industry regulations and legal requirements.
- Digital assistant that reviews client documents and reports on securities/financial assets to ensure adherence to industry compliance regulations and requirements.
Healthcare and Pharmaceuticals

- Automate, tag, and ingest healthcare records in compliance to industry regulations and requirements.

**Legal and Professional Services**

Utilities

- Automate the ingestion and review of 1 million quality control documents annually
- Automatically review client history and contracts to facilitate risk assessment and scoring for 1.5 million documents annually
- Leverages containerized cognitive services to classify CCAI documents.

We help to further clients' digital business evolution across a wide range of knowledge mining solutions including, but not limited to:

- Social Media Sentiment Analysis
- Internal Knowledge Management
- Line of Business Decision Making
- Internal Employee Engagement
- Compliance and Controllership
- Business Operations Automation
- Financial Analysis
- Customer Service and Sales Support
- Legal Contracts Review
- Automated Document Management

Knowledge Mining Solutions to advance your Digital Business Evolution

Offerings

From ideation, to build, and run, Neudesic has a suite of offerings focused on accelerating an organization's adoption and development of intelligent applications.

AI Design Sprints

3 or 5 day facilitated sessions focused on education and identifying value driven use cases for Knowledge vmining and Document Intelligence Automation.

Proofs of Value Sprints

Verify and provide evidence how a knowledge mining /document intelligence use case concept will produce the desired business objectives and results. Our Proof of Value Sprints focus on quickly creating working code using your data and use cases.

Implementations

Put AI plans into action via a world class bot to enhance your customer or employee experiences and further evolve your digital business.

Thank You
