

# Microsoft Copilot for Security Accelerator

## Empower Your Security Team with Enhanced Protection and Streamlined Operations

With Neway's Microsoft Copilot for Security Accelerator, your organization will be fully prepared to harness the full power of Microsoft's advanced security capabilities. This service empowers your security team with the tools, insights, and flexibility needed to enhance protection, streamline operations, and respond proactively to emerging threats. Through seamless integration with Microsoft security products and the ability to customize and extend its functionalities, Copilot for Security becomes a pivotal part of your organization's defense strategy.

## 8 Key Features .....

### 1 Value Discovery

- Facilitate business value conversations across key functions such as sales, customer service, and finance to create a blueprint for understanding the potential impact of Microsoft Copilot on your organization.
- Ensure each department maximizes Copilot's benefits by aligning its features with their specific goals and challenges through a role-specific value discovery process.

### 2 Current State Analysis

- Conduct a thorough review of your existing security infrastructure within Microsoft 365.
- Assess current security policies, configurations, and compliance status.
- Identify vulnerabilities and areas of potential risk that may impact the deployment of Copilot for Security.

### 3 Readiness Assessment

- Evaluate your organization's preparedness to integrate Copilot for Security features into your existing security framework.
- Identify gaps and areas for improvement to ensure that your security operations can fully leverage the capabilities of Copilot for Security.

## 4 Integration with Microsoft Security Products

- Conduct a thorough review of your existing security infrastructure within Microsoft 365.
- Assess current security policies, configurations, and compliance status.
- Identify vulnerabilities and areas of potential risk that may impact the deployment of Copilot for Security.

## 5 Customization and Extensibility of Copilot for Security

- Discover how to customize Copilot for Security to meet your specific organizational needs, tailoring its features and functionalities to align with your unique security requirements.
- Explore ways to extend Copilot for Security's capabilities through APIs and third-party integrations, enabling you to build a more flexible and scalable security infrastructure.

## 6 Actionable Recommendations

- Provide customized strategies and best practices for optimizing your security posture with Copilot for Security.
- Offer detailed guidance on specific enhancements needed to strengthen your security environment.

## 7 Implementation Support

- Assist your team in implementing the recommended changes, ensuring a smooth and efficient deployment of Copilot for Security.
- Provide expert guidance to align your security operations with the advanced capabilities of Microsoft's security tools.

## 8 Ongoing Monitoring and Optimization

- Deliver continuous monitoring and optimization services to maintain a robust security posture.
- Adapt security strategies in response to evolving threats, business needs, and technological advancements, ensuring long-term protection.
