Microsoft 365 Migration

Blue Sky the Color of Imagination

Blue Sky the Color of Imagination approached New Charter Technologies to develop a plan to migrate from on premise Exchange and files servers and an on-premise legacy phone system to a Microsoft 365 solution that included Exchange Online, SharePoint Online and Teams requirements, it was essential to provide a compliant solution with full governance.

Challenge

Security was critical with the ability to maintain security across multiple access sites. Blue Sky has become a 90 percent remote workforce since the Covid-19 pandemic. Protection of company intellectual property was key even though employees could be working anywhere from a home office to a coffee shop.

The project needed to address four key areas:

1. Security – Identity Management
2. Data Loss Prevention and Rights Management
3. Performance
4. Ease of use

Solution

New Charter Technologies – Leveraging their comprehensive experience in Microsoft 365 security and governance, coupled with their expertise in migration from multiple types of environments, NCT was able to architect and implement a Microsoft 365 solution that addressed all the Blue Sky's objectives. Microsoft 365 solution stack provided a dynamic solution with security and scalability to meet Blue Sky's future needs.

Benefit

Client satisfaction with the access experience was extremely positive due to the infrastructure solution architected by I.T. Responsive, a New Charter Technologies Company. I.T. Responsive's project management services coordinated Blue Sky, I.T. Responsive, and NCT resources to deliver an optimized migration strategy that addressed security and end-user experience. The POC (proof of concept) exceeded utilizing internal resources to perform this function.

By embracing cloud-based technologies Blue Sky has been able to increase sales and provide a superior customer experience.
