

NEWCOMP ANALYTICS

ANALYTICS BOOTCAMP

NEWCOMP.COM

The way data is fundamentally designed, collected and stored has not changed in 20 years.

The result? Huge proliferation of data that needs a ton of effort to make any sense of it.

CHALLENGES

More data than ever before, in more formats and structures, coming faster and noisier than any time in history. Capturing this data, organizing it and delivering insights to consumers is possible thanks to the cloud and X-as-a-Service – but this is a crowded, rapidly evolving domain.

IDEAL SOLUTION

An enterprise analytics program has stakeholders from all over your organization – from the field to the C-suite. Everyone needs to work together to understand the opportunities around exploiting your data assets, then prioritize the tasks, all while using a common language.

DESIRED OUTCOMES

Align all of your stakeholders by cutting through marketing noise, gaining a common understanding of a modern analytics deployment, and plan to implement the most important capabilities first.

Newcomp Analytics

Analytics Bootcamp

Canada's most successful corporations, governments and organizations turn to Newcomp Analytics for an insider's view of modern data and analytics.

Our **Analytics Bootcamps** help to accelerate learning and define the skills and tools for working with today's vast data environment, from strategic planning to deploying your future analytics environment on Microsoft Azure.

BOOTCAMP OVERVIEW

Our one-day coaching sessions pair one of our experts and your team, where we help define and break down seemingly complex modern data pipeline components including like APIs, data lakes, data science, machine learning and more.

WHAT SHOULD YOU EXPECT?

The first half of our day is dedicated to understanding the myths, trends, components and best practices around deploying a modern analytics environment. In the afternoon, we work together to define opportunities for pilot projects and communicate your plan when you return back to HQ.

THE POWER OF AZURE CLOUD

The evolution of "the cloud" continues to lower the barriers and cost of entry into advanced analytics. This means any organization can compete on an elite scale, rapidly deploying new models and solutions as economic trends and conditions evolve. Microsoft Azure is the most widely-used cloud platform for enterprise-scale analytics.

Analytics Bootcamp + Microsoft Azure

Analytics leaders who attend our Bootcamps walk away with a practical and actionable understanding of their next mission – to craft and communicate a real plan to start their analytics journey. Early adopters of advanced analytics have tried, failed, learned and succeeded already. We bring these lessons to share with you, giving you a head start as you prepare to tackle the most complex data challenges your company faces.

YOUR ADVANTAGE

Gone are the wild early days of modern data science and big data management – but the lessons learned and global benefits are now established for you to accelerate your own data initiatives.

AT YOUR SERVICE

The Microsoft Azure platform has evolved as the world came to appreciate the value of data. Get started without installations, hardware, specialized skills – there is an Azure service for each step in the data pipeline.

WHITE GLOVE SERVICE

With the depth and skill of Newcomp's data science & engineering teams, combined with Microsoft's world-class technology & support structure, you have an entire team by your side as you embark on each of your data and analytics journeys.

Analytics Bootcamp & Customer Success

The customer, one of the largest oil and gas producers in Canada, faced the challenge of developing a single source of truth for analytics while feeling pressure from upper management to deliver on and use machine learning and data analytics. The Analytics Bootcamp provided the customer with the knowledge they needed enabled them to make informed decisions regarding the organization's analytics journey.

"I had more than one a-ha moment during the presentation." – Operations Engineer

"Now that we are up to speed, what do we do next? How do we get there?" – VP, Exploitation

"There's so many fluffy explanations out there, it's nice to finally get what the world is talking about." – Manager, Thermal

NEWCOMP ANALYTICS

Let's make sure you get the most out of your time investment.

Talk one-on-one with Newcomp's senior practice leaders to understand how the Analytics Bootcamp could benefit your unique culture and environment.
