

New Business Dimensions BIND Platform

Our Journey

Banking – an industry who is operating in a very regulated environment needs an accurate Reporting System

Challenges

- Single version of truth**
- Quality of data in reports**
- Possibility to investigate through data**
- In time reports**
- Data quality for achieving compliance**

- Heterogeneous IT systems (apps and DB)**
- Data synchronization in different reporting system might be different**
- Needs for reporting is on the spot**

Ideal Solution

- Centralized reporting system**
- Internal validation mechanism for data quality in reports**
- Business knowhow inside the platform for risk and financial managers**

- Understanding of business and IT requirements**
- Working on a “known road” based on experience**
- Deliver an end-to-end project and supporting for go live;**

Desired Outcomes

- Out of the box reporting platform for statutory reporting requirements**
- Cross-check mechanism for data validation**
- Predefined reporting templates**

- Client will have single source of data in ports with validation mechanism inside**
- All statutory reports are predefined**
- Governance for master data and report catalog**

Business Intelligence at New Dimensions. We know it works; you tell us how!

Be sure that you are compliant

Validated platform over years of utilization by many financial institution

We know how to do it; we have experienced team in more than 100 BI projects

Save time

Fast implementation with NBD following best practices and validated methods

Act in small steps for benefit from beginning of results based on implementing predefined modules

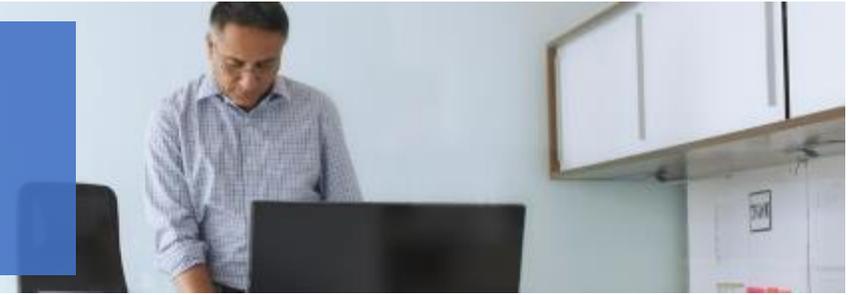

Save money

Avoid penalties from authorities for non in time reporting

Avoid consuming resources and money in creating ad hoc reporting or maintaining them manually in different systems

An integrated Reporting Platform which has internal rules of data processing for calculating and obtaining all required reports and analysis represent the ideal alternative for start building a robust reporting system.

NBD – BIND Platform

Using MS SQL and POWER BI or Oracle tech stack on BIND Platform we cover all possible functionalities and request that a client could have in terms of IT, security and business;

Solution Alignment

Performance, Security and Administration

Having all benefits from an enterprise database, requirements as: data partitioning, compression, advanced security for GDPR compliance, in-memory, column store, advanced analytics are not anymore a pain!

User benefits and interface value

**Using graphic design from Power BI, each user easily can create his dashboard
Enhanced scalability in terms of new module and new reports its on user click**

Time to act

**New report deployment can be easily done using Microsoft or Oracle tools
Complex algorithms are now easy to calculate using R & Python language**

Customer Success Story

Libra bank chose to implement with NBD several BIND modules on MS SQL and Power BI:

Basel3 engine and reporting

IFRS9 engine and reporting

BIND EBA - Regulatory/statutory reporting

System

- Project signed in august 2017
- Financial sector/Romania

Win Results

“BIND on Microsoft was the best solution that fit perfect in our environment” - CIO

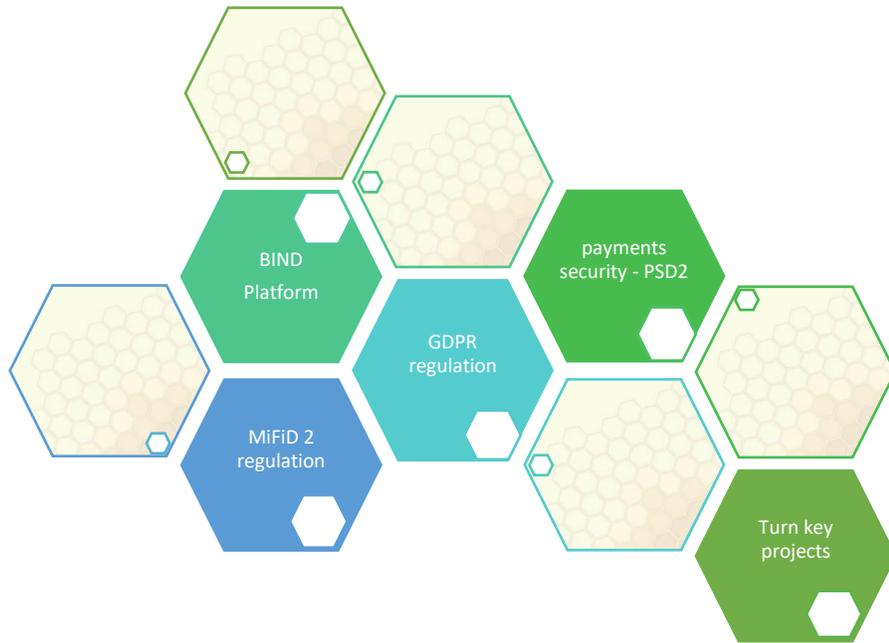

NBD& MS were the single providers with such experience and proven technology that give us the confidence of in time delivery without risks – “ CFO”

**“ We are confident in project scalability over the entire bank reporting system over a Microsoft DWH”
- mgmt. team**
