

Cognizant Neuro[®]

Bot Migration to Microsoft Power Automate Desktop (PAD) with Cognizant Neuro[®] Automation Workbench

Duration:
5 – Weeks
per medium
complexity
process*

Enterprises want more and faster business value from automation. To achieve this, they are reevaluating and consolidating their tool landscape.

Multiple automation tool vendors inhibit automation scalability

Tools focused approach often overlooks process bottlenecks

Tech heavy knowledge to use tools inhibits wider usage across business functions

Microsoft Power Platform is a standardized low-code platform of choice due to:

- Aligned tech strategy - from azure to office
- Provision of all features into one platform offering
- A complete cloud with O365 as backbone

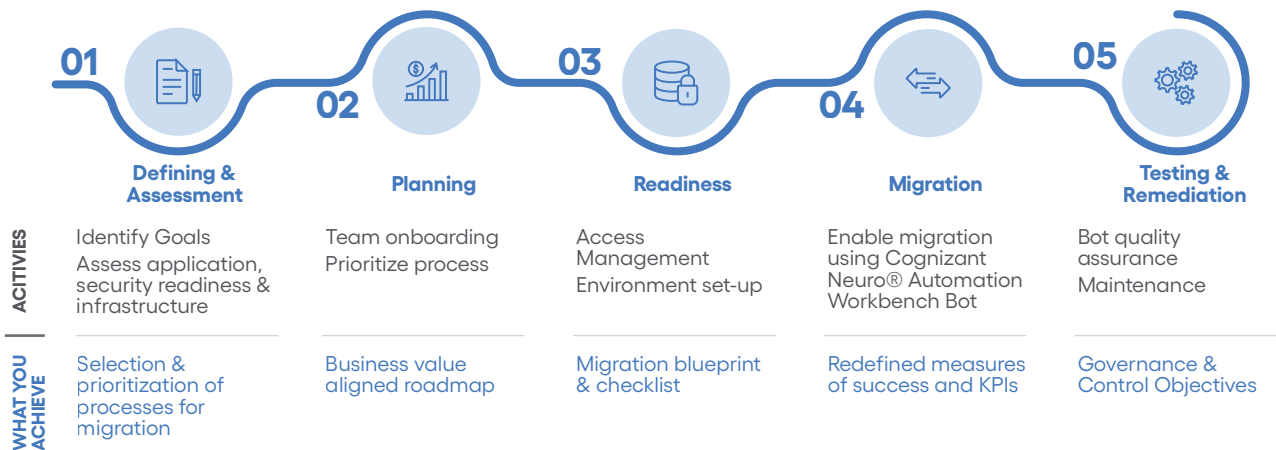

Cognizant Neuro[®] Automation Workbench is a one stop solution curated to handle migration to Microsoft PAD seamlessly and ensure quality across your automation delivery.

*A medium complexity process is defined as a process that has 500 to 2000 lines of codes that need to be migrated to Microsoft PAD platform

Our Approach

Our pragmatic and risk mitigated approach allows for smoother migration.

Benefits of using Automation Workbench

Cognizant Neuro® Automation Workbench has a process centric design that focuses on business process flows ensuring that operations & business users can easily define & verify automation requirements. Code quality is assessed, and review dashboards are generated to ensure bot framework is accurate. Moreover, our approach is scalable, future proofing your enterprise-wide automation.
