Phase 1 – Envisioning
Immersive envisioning that includes virtual experience center with industry experts working with your organization to define your specific needs and requirements, & a sandbox environment to conduct POCs to give a real-life feel of the end solution.

Phase 2 – Architecture Definition
Analysis performed to outline the Solution Architecture, including requirements catalogue, solution design, architecture and deployment storyboard.

Phase 3 – Deployment
Agile deployment to plan, develop and test each feature identified during the envisioning and architecture definition phases.

Phase 4 – Release
Transition from the Agile Lifecycle to the end-user experience. This includes UAT and Production release of completed capabilities and a client demonstration, UAT testing, and can potentially include additional data migration and end-user training components.

Phase 5 – Support
Designed to assist with a client transition to using the new Product post-MVP launch
