

Go Faster, Go Better with Cognizant LifeCare 2.0

Accelerate your digital transformation and value realization with Cognizant's ready-to-run pharma-specific solution

Growth by acquisition in the life sciences industry has repeatedly led to complex duplicative ERP landscapes with possible compliance exposure. Meanwhile, high IT costs are driving firms to rethink their need for custom solutions, only customizing where specific business strategies justify the implementation and maintenance expense. Add to this ongoing regulatory pressure, public sentiment and stakeholder interests and it is no wonder why many life sciences companies hesitate at the prospect of upgrading their SAP

operating environments, your existing operations, while you also leverage digital innovation to explore new territories and expand your business.

Cognizant's LifeCare 2.0 is built to accelerate and simplify S/4 HANA digital adoption, incorporating pharma-specific solutions to provide significant savings in time and effort.

Developed on the strength of Cognizant's deep pharma experience serving leading life sciences companies worldwide, LifeCare 2.0 reflects the industry's best practices as manifested in must-have pharma enhancements. The solution comes preconfigured with ready-to-run analytics and testing automation, time-to-market for digital transformation can be compressed, cost can be cut and return on investment can be greatly accelerated.

Lifecare 2.0 Creates Value Along Three Channels

LifeCare 2.0 is a unique pre-configured system featuring Cognizant's deep pharma experience and an SAP Activate-based implementation methodology to deliver the industry's fastest path to value realization on S/4 HANA. Specifically, it creates value along three critical channels:

- **Preconfigured Life Sciences Best Practices**
 - Including procure-to-pay, supply chain planning execution and quality, order-to-cash, and accounts-to-reports process workflows that accelerate design and support change management for an average 20 percent reduction in implementation time.
- **“Must-Have” Enhancements** – Addressing core industry scenarios including:
 - DEA Compliance through automated procurement quota management.
 - Suspicious Order Management flagging suspicious orders for compliance review.
 - Customer Returns based on validated price, lot and batch information.
 - CMO Planning Cockpit for KPI monitoring and master procurement planning.
 - MRP Shelf-Life Planning, supported by embedded analytics and custom Fiori capabilities, to optimize inventory.
- SolMan Integration – Minimizing downtime and supporting reusability on upgrades and change requests.

In addition, LifeCare 2.0 includes automated multi-hop intercompany invoicing for tax advantageous transfer pricing and out-of-the-box embedded analytics with over 50 pharma KPIs and custom track-and-trace serialization capabilities.
