

# Secure Modern Workplace Platform

Technology has rapidly evolved the workplace, enabling teams to collaborate, connect and be more productive than ever before, no matter when or where they work. The modern workplace environment offers game-changing benefits, but security concerns like phishing attacks, social engineering, ransomware, malware and hacking are persistent threats.

Secure Modern Workplace from the Cognizant Microsoft Business Group provides a platform native, end-to-end solution for safeguarding your workplace systems leveraging Microsoft expertise and a Zero Trust security model. Our approach builds on traditional security principles with layers of additional controls to continually verify users, resources, devices and applications, assigning the lowest access level required for given roles and responsibilities.

## REDUCE RISKS AND PROTECT YOUR WORKPLACE FROM THREATS

### THE DIGITAL WORKPLACE

We will help you implement a modern workplace platform that provides a fresh new employee experience, fuels collaboration and enables enhanced productivity – with the latest workplace technologies deployed and configured to your exact requirements.

### MANAGED SOLUTION WITH THREAT DETECTION AND RESPONSE

Security experts to manage your modern workplace solution and continually monitor, detect, investigate and respond to security events, threats and compliance concerns on your behalf, utilizing Microsoft's advanced security and compliance suite to safeguard your solution.

### BUSINESS FOCUSED OUTCOMES:
