WAREHOUSE ASSESSMENT

A warehouse Optimization Assessment helps you uncover inefficiencies and effectively leverage D365 Supply Chain functionality to unlock improvements and optimize resources.

Nexer's D365 supply chain experts will dive deep into your current warehouse operations, analyzing data, processes, and workflows within your D365 system.

The warehouse optimization assessment includes:

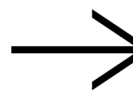

Identifying bottlenecks: Pinpoint areas where inefficiencies cost you time and money, from picking and packing to inventory management and shipping.

Creating Data-Driven Insights: Leverage data from D365 to provide actionable recommendations backed by concrete evidence.

Recommending Tailored Solutions: Develop a customized plan for improving warehouse efficiency and optimizing D365 SCM.

ASSESSMENT AREAS OF FOCUS

- Warehouse layout and labeling
- Inventory movement and storage
- Receiving and putaway
- Shipment management
- Picking and packing
- Shipping and documentation
- Raw material picking
- Finished goods receipt and putaway
