GENERATIVE AI

**1-DAY ASSESSMENT &
DISCOVERY WORKSHOP**

MAXIMISING THE POWER OF GENERATIVE AI

As organisations consider adopting increasingly larger AI models, such as Generative AI, it is crucial to carefully evaluate their potential drawbacks before integrating them into business operations.

Enterprises can fully unlock the potential of Large Language Models (LLMs) and effectively monetise their data through a comprehensive Generative AI solution. Aligned with Azure, this solution serves as a platform to enable the capabilities of ChatGPT and OpenAI.

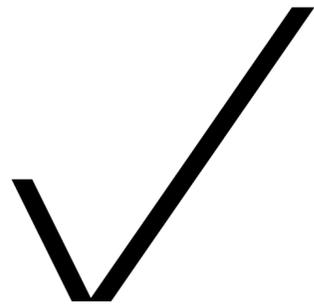

Integrating Azure OpenAI with proprietary data in the data platform allows for tailored processing capabilities specific to the business and opportunities.

Unlocking valuable insights, uncovering hidden patterns, generating relevant content, and empowering decision-making processes can be achieved by customising unique data assets.

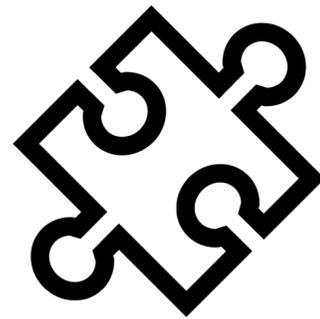

Leveraging Generative AI on Azure empowers clients to drive digital transformation, scale data platforms, and extract valuable insights. This increases productivity, efficiency, accuracy, and quality, saving costs. Furthermore, it enables leveraging external data capabilities on in-house data, gaining a competitive advantage through personalisation, and harnessing the capabilities of best-in-class LLMs with transparency and trust.

AGENDA

*The above is a sample agenda provided for illustrative purposes only. It is meant to serve as a starting point and can be customised to suit the specific needs and requirements of your workshop.

Partnering with Nexer Insight and Microsoft, you join the Generative AI revolution and fast-track your organisational transformation with Azure OpenAI services and AI-embedded applications and tools.

By harnessing the power of Generative AI and Azure OpenAI, Nexer Insight redefines how organisations operate, innovate, and make decisions, propelling them into a new era of productivity and growth. We prioritise Responsible AI principles and ensure secure data handling, allowing your organisation to unleash the full potential of OpenAI and ChatGPT safely and ethically.

Unleash the untapped potential of advanced AI and machine learning technologies with Nexer Insight's dedicated Generative AI Team. Experience accelerated productivity, gain invaluable insights, and elevate customer service through a comprehensive rollout of Azure OpenAI. With our extensive expertise in Technology, Financial Advisory, and Management Consulting, and our Exponential Labs Innovation Hub, we deliver game-changing Generative AI solutions that can truly

NEXER

A POWERFUL PARTNERSHIP WITH MICROSOFT

As a trusted Microsoft Cloud Solutions Partner, we have a strong global relationship with Microsoft, collaborating directly with their product engineering teams. Our expertise and offerings include the following:

✓ A team of specialists with extensive experience & advanced training

✓ Industry-leading standards & attentive customer support

✓ Best-in-class training tools & programs

✓ Consultative expertise in Microsoft implementation & deployment

Our extensive range of specialisations is a testament to our unwavering confidence in our deep technical expertise. We fully align with Microsoft, ensuring unparalleled support and ground-breaking Data Analytics, AI and IoT solutions.

NEXER

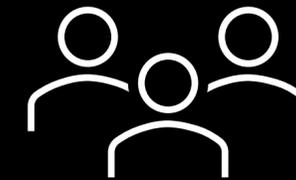

ABOUT US

At Nexer Insight, we specialise in IoT and advanced analytics, harnessing the power of diverse cloud platforms to deliver optimal solutions for our customers.

Our expertise extends to multi-cloud environments, allowing us to adapt to various technologies seamlessly. From product to service development, Nexer Insight covers all aspects of digital transformation. Our team comprises highly motivated specialists, including Cloud specialists, Full-stack developers, Mobile developers, IoT specialists, Data Engineers, and Data Scientists. As a trusted leader in advanced analytics, we help businesses optimise operations and make data-driven decisions. With a focus on advanced data analysis, predictive modelling, and artificial intelligence, we unlock efficiency, boost performance, and uncover new growth opportunities.

Nexer Insight is part of Nexer Group, an international tech company deeply rooted in Swedish entrepreneurship and innovation. With a strong presence across 15 countries and the Danir Group's support, our 2,500 experts collaborate with world-leading companies in digital transformation, IT, tech, and R&D.
