# Teams Voice Assessment

Analyze and Design

Evaluate the current voice environment and company needs to determine the correct path to leverage the many options of Teams Voice. Identify and compare potential costs and options.

- Analyze existing infrastructure
- Ensure clear path forward when integrating Teams Voice
- Evaluate security and requirements
- Cost modeling and predictions
- Strategies for legacy architecture
- Identify current system needs and dependencies
- Determine migration paths and risks
- Provide high level design and architecture based on previous analysis.
- Develop and provide reporting highlighting information gathered and path forward.
