# Microsoft 365 Copilot readiness assessment

## Built on strong foundations

As organisations increasingly explore how Microsoft 365 Copilot can drive efficiencies across various business workloads and processes, they are discovering numerous benefits that enhance overall performance.

As interest in AI and Copilot agents continues to grow, organisations are beginning to ask critical questions: Where is our organisational knowledge stored? What is the quality and accessibiliut of that knowledge? What security and privacy considerations must be addressed? What are the best practices for implementation? And ultimately, is the organisation ready to embrace this transformation?

### Copilot readiness assessment

To help answer these questions, Nexon Asia Pacific's Copilot Readiness Assessment provides a streamlined and structured framework to ensure the foundations are set for success. This framework delivers:

An audit of your application, data, security, compliance landscape.

An audit of end user and organisational readiness.

A projected cost and ROI model.

A tailored roadmap and recommendations aligned with your business requirements.

## Doing the groundwork to unlock the value of Copilot

The four-step process includes: Discover, Workshop, Analyse and Recommend.

### Discovery Phase

- Infrastructure, application, and knowledge landscape

### Workshop Phase

- Stakeholder workshop
- Mutually agree approach

### Analyse Phase

- Assess the current information architecture
- Evaluate the existing security and compliance posture
- Review organisational and end user readiness
- Prepare a comprehensive report with recommendations and next steps

### Recommend Phase

- Present the findings and insights from the assessment report
- Provide cost modelling including ROI & TCO
- Define short-, Medium-, and longer-term priorities
- Collaboratively agree on execution of recommendations and use cases

Discover → Workshop → Analyse → Recommend → Pilot / Proof of Value → Evangelise
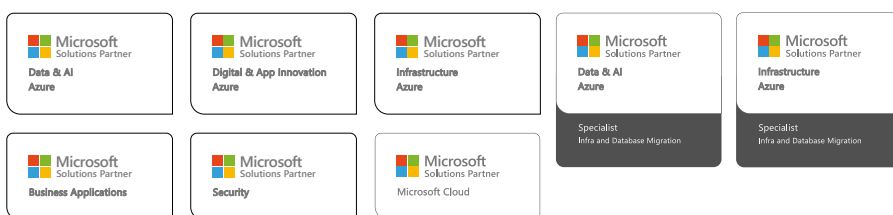

## A smarter path to innovate and automate

As part of our assessment, we take into account your organisation's strategic direction while ensuring the flexibility to adapt as needs evolve

Following the assessment, Nexon can support and manage the recommended continuous improvement program, providing the appropriate scaffolding and architecture to help you achieve your future state.

We enable organisations to fully everage the cost efficiencies, enhanced security and productivity benefits of modern cloud applications and services.

## Leveraging our expertise

As a Tier 1 CSP partner of Microsoft, our team of experts are ready to consult, secure, design, transform, and implement the best strategy for your needs, all backed by professionals who provide proactive support and monitoring. We give you the flexibility to adapt the technical landscape to your business requirements and guide you through the entire process at a pace that works for you.
