Features Overview

Load Planning

- Configurable Sales Order and Warehouse Processing PO, SO, TO
- Algorithm Based Least Cost Transport Provider Selection
- Transport Provider Preference by ShipTo/From Location by Mode & Temperature
- Drag and Drop Split Load Planning with "On-The-Fly" Milage and Cost Recalculations
- Dynamic Route Optimization and Order Consolidation & Costing
- Automated Cascading Dispatching with Optimal Provider Tender & "Silent Tendering"
- Automated Route Stop Optimization with Integrated PC-Miler Web Interface
- API Based Rate Shopping and Tendering Dry & Refrigerated Carriers
- Web Based Load Bid Management For Internal & External Carriers

Route Planning and Optimization

- Multi Stop & Multi Pick Order Consolidation With Automated Routing Guides
- Automated Routing GuidesAutomated "Cross Dock" and Transload Costing
- Multi Mode, Multi Temp Planning for Air, Ocean, Rail, Motor Carrier
- Load Profit/Loss Calculator Down To The Order/SKU/LOT Levels
- Master Lane & Sub-Lane Selections for International and Multi-Mode Shipments

Rate Shopping

- Inbound/Outbound Shipment Rating With Dynamics Comparisons of Carrier Rates
- Support for Salesman Based Rate Shopping via Web Collaboration Portal
- Tariff, Spot-Rate, Portal Bidding Based Rating
- Includes Bracket, Class, Distance, Flat, and Pallet Rating
- Automated DOE Weekly Fuel Updates Auto Recalculation Based On Ship Date
- Multiple Accessorial Fee and High Density Surchage Support
- SKU & LOT Level Benchmark & Cost Calculations

Accounting & Accruals

- Multi Tenant & Legal Entity Enabled
- Automated Order Ship Confirm For Cost Changes
- Automated Freight Bill Auditing & Approval Based On Tolerances by Facility
- Automated Freight Accrual Reversals & General Ledger Account Posting
- Native EDI & API Interfaces With 150+ providers
- EDI 204,990,214 & 210 Transactions Supported Directly To Provider Or 3rd Parties
- Multiple APIs Supported with Dry and Refrigerated Carriers

Dock Scheduling

- Automated Inbound & Outbound Multi Dock Support With Color Coded Warehoouse
- Automated Carrier "Self Service" Option Available
- Comprehensive Dock Specification Based On Dock Type, SKU Type and Capacity

Web Collaboration Portal

- Customer Based Order Inquiry
- Salesman Based Order Inquiry
- Carrier On-Line Bidding and Load Accept/Reject Portal With Logistics Manage
- Carrier Provider Load Accept/Reject & Tracking
- Shipment Status and Tracking Available For Internal & External CustomersOn-Line POD Upload and Carrier Settlement

Alert Management

- User Configurable & Stored In SQL Database Integration With M365 Outlook
- Predictive Lead Time Analysis & On-Time Exception Reporting
- Must-Leave-By Date & Time Calculator Based On Mode and Carrier Transportation

Third Party "Plug-And-Play" Integrations

- Microsoft Dynamics ERP D365 F&O, Business Central, Office 365
- PC-Miler Web, PC-Miler Rail, DAT Load Posting, P44 API, Trimble Engage Program
- Trimble Engage Lane Interface
- Supports Microsoft Office 365
- Supports Native Transportation EDI Transactions 204,990,214
- Supports Legacy ERPs Utilizing Web Services

Other

- 100% Web Based Code With "Responsive" Design To Allow For Desktop, Tablets
- 100% Microsoft Technology Stack Azure Cloud & SQL Server Database Managemen
- Traditional On-Premise Purchase Available
- On-Premise and Hosted Options Available SaaS Software As A Service Azure Cloud Hosted
- All Legacy ERPs Utilizing Web Services
