Business Problem

- Limited in-house expertise for advanced analytics, automation, or AI.
- Delays from troubleshooting and integration challenges.
- Urgent need for rapid enablement and best-practice adoption.

Solution Overview

- Provide your team with direct access to experts in Power BI, Power Platform, and Copilot Studio for real-time guidance, troubleshooting, and recommendations.
- Sessions are tailored to your initiatives, ensuring actionable outcomes and accelerated progress.

Benefits

- Accelerated project delivery and reduced troubleshooting time.
- Adoption of best practices and proven architectures.
- Improved solution quality and scalability.

Why Nextant

- ✓ Access to multi-disciplinary experts (AI, Analytics, Automation) who can integrate various Microsoft products into unified solutions.
- ✓ Proven track record and deep experience with Microsoft technologies (Power BI, Power Platform, Copilot Studio).
- ✓ Flexible engagement model (baseline offering can be extended to meet specific needs beyond this scope)

Methodology

Components	Duration	Scope & Deliverables
Kick-off Working Session	2 hours	Analyze current initiatives, set goals, and provide initial guidance to get started.
Weekly Sessions	8 hours per month (2 or 4 hours/week)	Weekly or bi-weekly sessions (2 or 4 hours each) for deep dives, troubleshooting, and enablement on priority use cases.

Cost:
\$4,300
