Next Generation Code Translation to Azure

SHIFT Cloud is the next generation in code translation
Putting the power of *SHIFT* in your hands

teradata.

ORACLE®

SHIFT > Cloud

- 1 Upload.
- 2 Analyze.
- 3 Translate.

Competitive Advantage

1. Self-Service

- Start translating code in 3-clicks. No need for lengthy training or technical skillsets.

2. Guaranteed Translation SLAs

- Perform a quick assessment and know with certainty your automation % to enable you to plan your project effectively – without surprises.

3. High Quality Code

- Translated code is compiled in target environment, syntactically checked, and run through synthetic data.
- Detailed error logs are provided, which accelerates remediation of exceptions

4. Support for a Wide Variety of Sources

- Support for a wide variety of source, with built-in best practices for migrating workloads to Azure.

5. Easy Deployment and Access

- Two deployment models to satisfy organizational data security policies (SaaS or Enterprise).

Operating Model

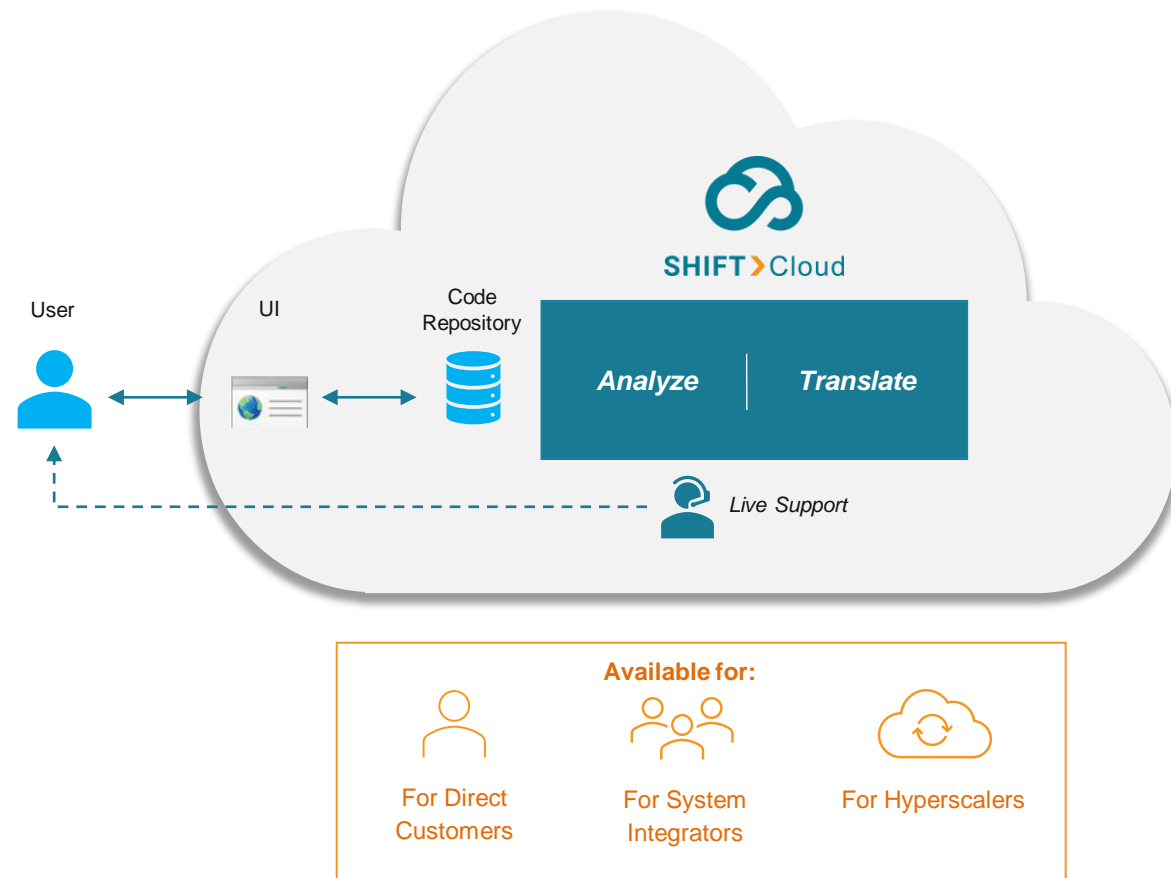

Self-Service Model

- Users can operate the technology with appropriate role-based access control across their organization
- Support many to many migration scenarios (if required)

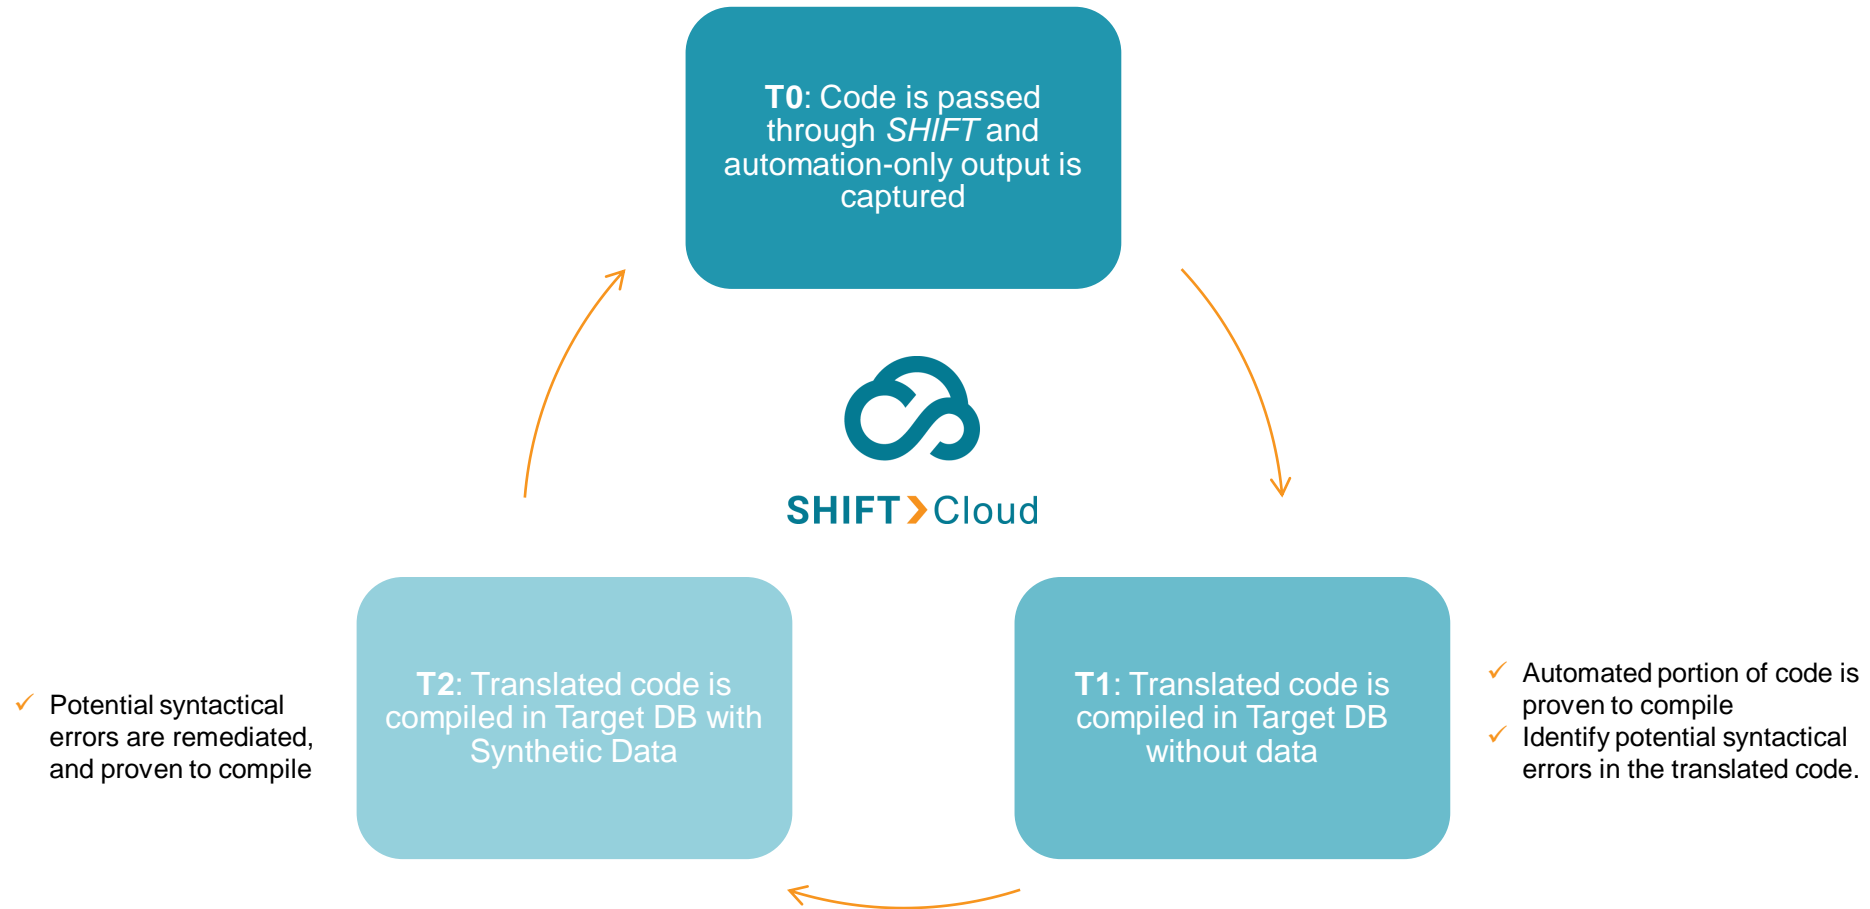

Users can perform 2 actions

- Run Analyzer to test the accuracy of the code conversion and establish translation cost
- Run Commercial Code Translation to receive translated code

5/24 or dedicated support option
