

# Cybersecurity Assessment

Understand your readiness for common security threats

## What to expect

Identify a baseline of your organization's cybersecurity policies

Use Microsoft Security capabilities to generate an overview of areas of focus

Map baseline and security scan results to common threat scenarios

Develop joint plans and next steps

## Enhance your security awareness with a Cybersecurity Assessment

Are you confident in your organization's cybersecurity measures? Human-operated Ransomware and insider threats are two of the most prevalent security risks, but over 98% of such attacks can be prevented with basic security hygiene processes and solutions in place.

We invite you to improve your security awareness with a comprehensive Cybersecurity Assessment. With Microsoft Security solutions, our expert team will help you:

- Understand the current state of your security
- Identify vulnerabilities
- Develop a long-term security strategy tailored to your organization

Ensure your organization's protection and compliance with industry standards. Schedule your Cybersecurity Assessment today and take a proactive step towards a stronger security posture.

## Why Nexus?

When it comes to security, you need an experienced partner.

The Nexus Technologies team consists of **Microsoft-Certified Cybersecurity Architect Experts**, ensuring you receive top-tier expertise and solutions tailored to your needs.
