Managed Endpoint Detection and Response Service (MEDR)
## using Microsoft Defender for Endpoint

Nexus Technologies, Inc.
in partnership with Microsoft

Endpoints are located at the farthest end of the network. Attackers use poorly-secured endpoints as a backdoor into the network. Most endpoints are operated by everyday people, who often don't have the ability to recognize an endpoint attack.

Nexus Orion is pleased to offer **Managed Endpoint Detection and Response (EDR) Servic**es. By leveraging **Microsoft's Defender for Endpoint**, organizations can easily defend and response against destructive threats coming to your email down to your desktops, laptops, and servers.

Nexus Orion's Managed Endpoint Detection and Response delivered using Microsoft's Defender for Endpoint to provide the following:

In-country Security Operations Center

Service Delivery Management

Service Transition

Nexus Orion Managed Endpoint Detection and Response Service
