Fabric Deployment Accelerator

WE HELP YOU ACCELERATE THE DEPLOYMENT OF MICROSOFT FABRIC, GIVING YOU A MODERN, SCALABLE DATA PLATFORM IN JUST 3 WEEKS.
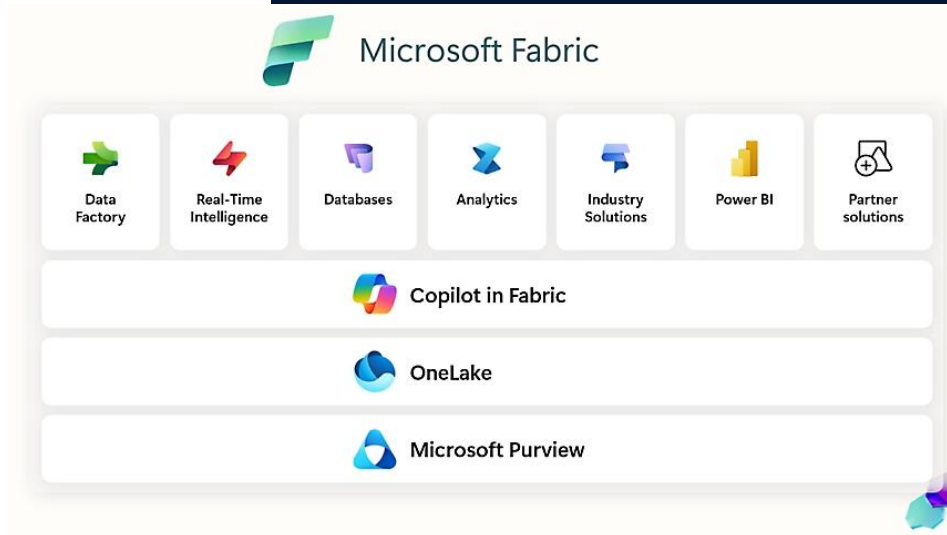

Our Fabric Deployment Accelerator is designed for organisations with multiple systems, fragmented reporting, or no existing data lake, delivering an end-to-end solution from ingestion to ready-to-use datasets in Power BI.

Deliverables

- Scope and Requirements document
- Detailed Design Document
- Implemented Fabric environment.
- Pilot pipeline.

Scope

- Conduct workshops and education sessions with key stakeholders to gather technical, functional, security and operational requirements.
- Review the Azure environment and identify any blockers or remediation needed.
- Prepare a detailed design for the Fabric solution customised to your needs. **This will typically involve:**
  - Separate Dev, Test and Production workspaces and security
  - Bronze, Silver and Gold data lakes.
  - SQL and semantic endpoint configuration
  - Security, Management, Monitoring configuration and integration.
- Implement the Fabric platform into your Azure environment.
- Deploy a single end to end pipeline from ingestion through to PowerBI

Assumptions

- Access to an empty Azure subscription or resource group with owner/contributor level permissions (permissions reduced after initial configuration)
- Security model is based on Entra and the zero trust principles.
- Dev/Test/Prod environments exist inside a single Fabric instance

Effort

- Duration 3 weeks
- ~$30K (Plus GST)
- Microsoft funding options may be available
