# Nintex Automation CE

Power up productivity with purposeful automation. Too many systems and tools slow down daily work, your people, and the speed of business. Cut through chaos, simplify complexity, and clear the path for processes and apps that power your business and engage your workforce with Nintex. Help your teams move faster and smarter, driving growth and efficiency.

As your business grows, processes can become more complex, involving multiple teams, systems, data sources, regions, vendors, partners, and customers.

How do you manage that growth while minimizing complexity, tech spend, and IT dependency? **Automation that integrates with your core systems and extends the value of your existing resources.**

**Nintex Automation CE helps you:**

➡️ Manage your business with easy-to-use, powerful tools that build processes, workflows, and applications for efficient work and productive teams.

➡️ Simplify the most complex processes and workflows—allowing your team to focus on high-priority tasks instead of follow-ups and unclear actions.

➡️ Identify key processes, automate important workflows, and create custom apps that give users access to information from any system.

➡️ Empower non-technical team members like business analysts or line-of-business operations teams with easy-to-build drag-and-drop capabilities, while IT centrally manages tools for governance, security, and integration requirements.

## Business benefits*

| | | |
|---|---|---|
| **100s** of hours of admin work freed up per year | **$1,000s** saved in review and approval costs | **30%** faster onboarding completions |
| **>200%** ROI over 3 years and typical 9-month payback period | **3-5** days to create complex forms and workflows, not weeks/months | |

*Metrics based on results seen by current Nintex customers.

# Customer success story

## Hernando County School District cuts costs, speeds crucial processes, and improves compliance

**SITUATION**

Hernando County School District, located in Brooksville, Florida, needed to formalize and automate processes within its overwhelmed facilities and construction department. With ongoing construction, receiving timely building permits was crucial. The department needed software to streamline its permit processes within a tight public sector budget.

**SOLUTION**

Hernando County School District turned to the Nintex Automation CE platform.

- **Process management** allowed them to map and understand their existing construction and operational processes and identify bottlenecks, inefficiencies, and compliance gaps.
- **Forms automation** simplified data collection and ensured consistent and accurate information gathering.
- **Workflow automation** streamlined approval processes, eliminated manual handoffs and reduced the risk of delays and errors.
- **Document generation and e-signature** were utilized to automate document creation, distribution, and signature, bringing the Hernando County School District's automation journey full circle.

**RESULTS**

By documenting, managing, and automating their permit processes with Nintex, Hernando County School District boosted operational efficiencies, cut costs, and ensured building safety compliance—ultimately benefiting students, staff, and the community:

- Improved compliance with fully-documented, automated, and accurate forms and workflows.
- Saved time – **90% reduction** in employee document handling.
- Reduced costs – **80% decrease** in licensing/installation costs.
- Reduced IT burden – empowered employees to own their processes.

"

Like so many organizations, particularly in the public sector, our people have been overwhelmed by growing workloads. We're using Nintex to alleviate this problem and do more with less. We now complete the building permit approvals in half the time.

**Brian Ragan,**
Director of Facilities and Construction, Hernando County School District

# Product capabilities

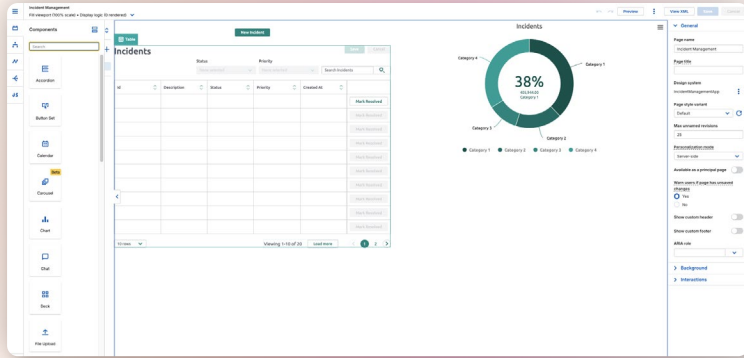

## Process Management

Take control over how work gets done by easily identifying, mapping, and modeling your processes. Use AI to discover and document processes. Then manage and improve your processes over time—driving greater efficiency and compliance.

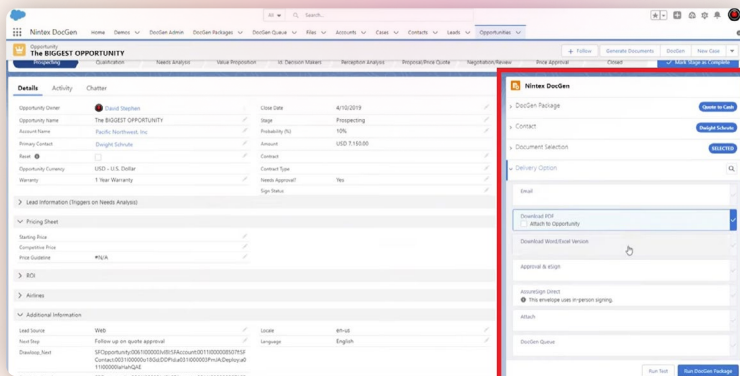

## Workflow Automation

Drive efficiency up and costs down by automating forms and processes without coding. Anyone on your team can build forms and workflows in minutes with AI tools. Empower your teams, delight your customers, and save valuable time and resources.
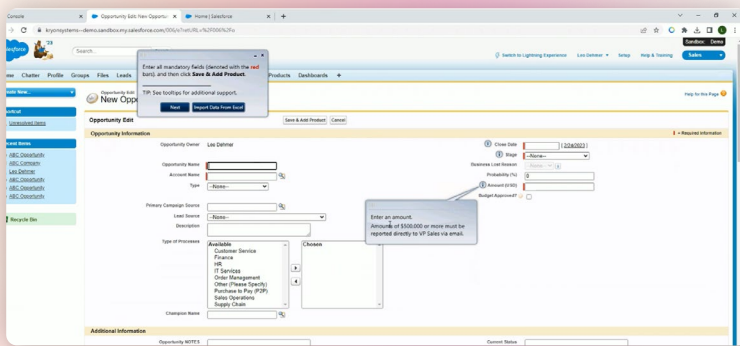

# Product capabilities

## Application Development

Easily create branded end-user apps that connect systems, pull data, and enable workflows using simple drag-and-drop tools. Create powerful, intuitive, and memorable experiences for your users—whether they interact with dashboards or portals.

## Document Automation

Instantly create and send custom documents and collect e-signatures from software like Salesforce or across multi-system workflows—no coding required. Accelerate time-to-revenue and reduce risk with standard document templates generated and sent automatically. Easily create custom documents in any format and language from any data source.

## RPA

Let Nintex software bots handle all your repetitive computer tasks. Robotic process automation (RPA) speeds up your workflows—whether it's working alongside your team, guiding them on unfamiliar next steps, or running tasks alone. Our virtual team works around the clock—so your human team doesn't have to.

# The Nintex difference

## Pricing

Nintex subscription pricing is transparent and predictable. The more you automate, the more efficiency you gain, the more you pay. Nintex offers tiered feature and consumption packages to meet any budget, large or small.

## Support

Nintex is there for you along your automation journey. Our global, world-class support teams will ensure you get the help you need, when you need it. 8×5, 24×5, and 24×7 support packages available.

## Services

Nintex has automated processes since 2006. Whether you need assistance with planning, implementation, or maintenance, our experienced professional services team can help you achieve your automation goals in the shortest time possible.

## Partners

Access 700+ Nintex implementation partners globally who can make your automation vision a reality. With partners who specialize in specific technologies, use cases, and verticals, there's bound to be a partner that's just right for you.

## Solutions

Accelerate time-to-value and ROI even further with pre-configured, industry-specific solutions such as Licensing and Permitting Automation, and ecosystem-specific offerings such as document generation and app development for Salesforce.

At Nintex, we believe intelligent automation can remove friction from work and inspire teams to build a culture of efficiency that accelerates business success.
